

GoTo™ North America Focused Delivery Program Hydraulics

World-class technology without the wait

Whether you're designing and building machines, implementing them in your factory, or servicing them, the GoTo Program is ready to work for you.

GoTo Product Overviews

► Electric Drives and Controls

► Tightening Technology

► Industrial and Mobile Hydraulics

► Linear Motion Technologies

► Assembly Technologies

The GoTo Focused Delivery Program offers a targeted selection of our high-demand products with short lead times and high availability. As a result, you receive your products quickly and reliably, allowing you to be agile and responsive in your own markets.

You benefit from simplified access to product information, preferred order processing and reduced delivery times. This allows you to complete your machine or system on schedule.

Our GoTo product overviews, whether in printed form or on the Internet, show you the complete portfolio. In addition, our web pages quickly provide you with additional information on the respective product, on the technical data as well as on ordering.

Hydraulics GoTo Catalog

Bosch Rexroth is pleased to present our Hydraulics GoTo Product catalog as part of our GoTo Focused Delivery Program.

The GoTo Focused Delivery Program streamlines everything to make it easier for you to get a selection of our most popular Rexroth products faster. You'll benefit from quicker access to product information, reliable lead times that meet or beat the expectations of the market, and enhanced customer service.

The same GoTo product portfolio is now available in the United States, Canada, and Mexico. With the same quantities and lead times (from order acceptance to shipment in business days), GoTo is even easier to use.

For additional information on the GoTo Program and a complete list of other quality Rexroth products available in the Focused Delivery Program just go to:

USA: www.boschrexroth-us.com/GoTo

Canada: www.boschrexroth.ca/GoTo

Mexico: www.boschrexroth.com.mx/GoTo

GoTo Program Delivery Conditions

How to place a GoTo order directly with Bosch Rexroth

Please clearly state “GoTo” on the purchase order, and ensure that all GoTo items are within the maximum GoTo quantity.

For products with a published lead time of one (1) business day, the ship date will be the following day, provided:

- the following day is a business day
- the order is placed by 1 PM (EST)

The contents of a GoTo order may not ship as a complete delivery and will not be shipped via the customer defined consolidation point / day.

All items subject to prior sale. It is advisable to confirm critical delivery requirements at time of order. All sales subject to Bosch Rexroth Terms & Conditions of sales for your country, which you can read at:

www.boschrexroth-us.com or
www.boschrexroth.ca or
www.boschrexroth.com.mx

Bosch Rexroth reserves the right to make program changes at any time without notice.

WARNING!

Failure, improper selection or improper use of the products and/or systems described herein or of related items may cause personal injury or property damage.

This document and other information from Bosch Rexroth Corporation, Bosch Rexroth Canada Corporation, and Bosch Rexroth S.A. de C.V., including its divisions, provide products and/or system options for further investigation by users having technical expertise. It is important that you analyze all aspects of your application and review the information concerning the products or systems in Rexroth's Data Sheets. Due to the variety of operating conditions and applications for these products or systems, the user, through his own analysis and testing, is solely responsible for making the final selection of the products and systems, and assuring that all performance, safety and warning requirements are met.

The products described herein, including without limitation, product features, specifications, designs and pricing are subject to change at anytime without notice.

GoTo Focused Delivery Program: Pumps

Variable displacement pumps

A1VO (Series 10)

The A1VO is a variable displacement axial piston pump in swash-plate design for load sensing hydraulic circuits in the smaller classes of mobile working machinery. This cost-saving alternative to the traditional constant pump facilitates a simple, economical switch to a load sensing system that reduces fuel consumption by thousands of gallons over its service life. Its compact size and adaptability make it suitable for a wide array of mobile machines including tractors, forklifts and commercial vehicles.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToPumps

Features

- Significant fuel savings of up to 15% compared to fixed systems
- Optimized efficiency, though same power at less fuel consumption
- Compact design with controller and connections integrated into port plate
- High flexibility: Pumps can be combined using interchangeable through-drive adapter
- Maximum flow of 105 l/min thanks to high self-suction speeds

Detailed information:

- RE92650

Technical Data

Size				35
Nominal pressure	p_N	bar (psi)		250 (3600)

1) "Shipment" defined as – not to exceed the time from receipt of order to Bosch Rexroth Hydraulics to shipment ex-factory (Bosch Rexroth plant location).

GoTo Focused Delivery Program: Pumps

Variable displacement pumps

A10V(S)O & (A)A10VSO (Series 31)

Variable displacement axial piston pump (A)A10V(S)O, Series 31 in swashplate design is available for open circuit applications. It can be used in both mobile and industrial applications. Flow is proportional to the drive speed and the displacement. By adjusting the position of the swashplate, it is possible to steplessly vary the flow. Multiple forms of pressure, flow or electrohydraulic controls are available.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToPumps

Features

- Sizes 10 to 140
- Axial piston swashplate design
- Open circuit
- Series 31 (sizes 18, 28, 45, 71, 100, 140), Series 52 (sizes 10, 28, 45, 60, 85)
- Combination of pumps of up to the same size can be mounted to the through-drive (not with size 10)
- Pump version starting with special code 'E' available for use with water-content fluids

Detailed information:

- RE-A92701
- RE-A92711

Technical Data

GoTo Focused Delivery Program: Pumps

Variable displacement pumps

A10V(S)O (Series 52)

Variable displacement axial piston pump A10V(S)O, Series 52 in swashplate design is available for hydrostatic drives in an open circuit. The flow is proportional to the drive speed and displacement of the pump. Flow can be steplessly varied by adjusting the swashplate angle. Long service life, low noise, and a favorable power-to-weight ratio make it ideal for mobile and industrial applications requiring a compact drive.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTopumps

Features

- Sizes 10 to 85 cc
- Axial piston swashplate design
- Open circuit
- Series 52
- Combination of pumps of up to same size can be mounted to the thru-drive (not with size 10)

Detailed information:

- RE-A92703

GoTo Focused Delivery Program: Pumps

Variable displacement pumps

A10V(S)O (Series 32)

Variable displacement axial piston pump A10V(S)O, Series 32 in swashplate design is available for hydrostatic drives in an open circuit. The flow is proportional to the drive speed and displacement of the pump. It contains a port for pressure transducers in the pump outlet and is highly resistant to sudden drops and spikes in pressure, contributing to maximum efficiency. Generally used in industrial applications, the Series 32 has a low-noise design and features a Universal through-drive with coverplate.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTopumps

Features

- Sizes 71, 140, & 180 cc (A10VSO)
- Sizes 45 & 100 cc (A10VO)
- Axial piston swashplate design
- Open circuit
- Series 32

Detailed information:

- RE-A92714 (A10VSO)
- RE92705 (A10VO)

GoTo Focused Delivery Program: Pumps

Variable displacement pumps

(A)A4CSG (Series 30 & 33)

Variable displacement axial piston pump (A)A4CSG is designed for hydrostatic drives in a closed circuit. The flow is proportional to the drive speed and displacement of the pump, which can be made infinitely variable through control of the swashplate angle. The (A)A4CSG features integrated boost pump and valving required for closed circuit operation which acts as both a feed pump and pilot pressure supply.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTopumps

Features

- Sizes 255 & 500 cc
- Nominal pressure: 5100 psi (350 bar)
- Peak pressure: 5800 psi (400 bar)
- Highly efficient with long service life
- Compact design, short installation length

Detailed information:

GoTo Focused Delivery Program: Pumps

Variable displacement pumps

(A)A4VSO (Series 10 & 30)

Variable displacement axial piston pump (A)A4VSO in swashplate design is available for open circuit applications. Sizes 40 & 71 are available in Series 10; sizes 125-250 are available in Series 30 and have the U99 Universal through-drive with coverplate. The flow is proportional to the input drive speed and displacement. By adjusting the swashplate angle, it is possible to infinitely vary the output flow. This rugged, low-noise pump is generally used in industrial 24/7 applications.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToPumps

Features

- Sizes 40 to 250 cc
- Series 10 & 30
- Open circuit
- HFC Seal Versions
- Special 'F' variant available for water-content fluids – bearing flushing required
- Special 'F2' variant available for water-content fluids – operation without bearing flushing (size 250 only)

Detailed information:

- RA92050
- RA92053 (HFC Fluids)

GoTo Focused Delivery Program: Pumps

Variable displacement pumps

A15V(S,L)O (Series 10)

Variable displacement axial piston pump A15V(S,L)O, Series 10 in swashplate design is for hydrostatic drives in an open circuit. The pump is typically used in stationary applications where efficiency and compact design are required. It can work either as self-priming or with a charge pump. Other notable features include low noise operation, fast control response, overcenter operation and Universal through-drive with coverplate. The A15V(S,L)O is competitively priced compared to other industrial high-pressure designs.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTopumps

Features

- Sizes 110 to 280 cc
- Axial piston swashplate design
- Open circuit
- Series 10
- Typical used for stationary applications

Detailed information:

- RA92800

GoTo Focused Delivery Program: Pumps

Variable displacement pumps

AA4VG (Series 32)

Variable displacement axial piston pump AA4VG, Series 32 in swashplate design is for hydrostatic closed circuit transmissions. The flow is proportional to drive speed and displacement which is infinitely variable depending on the swashplate angle. The pump is equipped with two pressure relief valves on the high pressure ports to protect the transmission from overload.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTopumps

Features

- Sizes 56 to 125 cc
- Axial piston swashplate design
- Closed circuit
- Series 32
- Integrated boost pump acts as feed and oil control pump

GoTo Focused Delivery Program: Pumps

External gear pump

AZPF and AZPN

Bosch Rexroth has been involved with the design, development and manufacture of gear pumps for many decades. Well-proven designs, the use of specially developed materials, constant testing and sophisticated mass production techniques ensure products of the very highest quality.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTopumps

Features

- AZPF – sizes 4 to 28 cc; AZPN – sizes 20 to 36 cc
- Plain bearings for high loads
- Drive shafts according to ISO or SAE and customer-specific standards
- Combination of several pumps possible
- Line connections: connecting flanges or female threads

Detailed information:

- RA10089 – AZPF
- RA10097 – AZPN

GoTo Focused Delivery Program: Pumps

Internal gear pumps

PGH

The PGH is a fixed displacement internal gear pump with an extremely versatile design, that's increasing in popularity within many variable speed drive applications. Along with its high pressure rating and low-noise and pulsation levels, the PGH reduces energy consumption and boosts overall system efficiency by providing only the flow and pressure as the system demands.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTopumps

Features

- Sizes 5cc through 250cc
- Wide speed range, excellent for variable speed applications
- Radial and axial gap pressure compensation
- Larger sizes have built-in gauge / bleed port
- Flexible combination concept, all pumps have through drive

Detailed information:

- Frame size 2 and 3: RE10223
- Frame size 4 and 5: RE10227

GoTo Focused Delivery Program: Pumps

Variable vane pumps, direct operated PV7

PV7 direct operated vane pumps are a pressure compensated design that improves system performance and efficiency vs. fixed displacement pumps. PV7 pumps can be used for lower pressure applications where low noise and pulsation are critical circuit demands.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTopumps

Features

- 4 displacements ranging from 10-25cc
- Maximum flow adjustment option is standard
- Compensator setting is lockable
- Multiple pressure options for each displacement

Detailed information:

- RE10522

GoTo Focused Delivery Program: Pumps

Variable vane pumps, pilot operated PV7

The PV7 is a variable displacement vane pump used quite extensively for low to mid-pressure applications for numerous market segments such as machine tool and packaging industries. The PV7 pump utilizes a journal bearing design and pivoting control pistons to provide a low noise and durable product for the industrial hydraulic market.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTopumps

Features

- 8 displacement sizes ranging from 14-150cc.
- All pumps are supplied with through drive capable shaft that is capped off with an aluminum rear cover
- PV7 pumps can be incorporated into combinations with many other Rexroth products including internal and external gear pumps, radial piston pumps, fixed and variable vane pumps and axial piston pumps.
- Multiple control options are available such as pressure control, flow control, solenoid unloading control, lockable controls, etc.
- PV7 design is European based, 4-bolt DIN mounting pilot and metric shaft

GoTo Focused Delivery Program: Pumps

Variable vane pumps, pilot operated VPV

Rexroth continues to offer advanced variable vane pump technology. Market conditions favor hydraulic components that operate at low noise levels without sacrificing efficiency or durability. VPV pumps feature an outstanding response to the needs of the market today and for the future.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTopumps

Features

- Sizes 16 to 164
- Flows from 30 to 287 L/min (7.6 to 75.8 GPM) in single pumps
- Available in combination with other VPV pumps and Rexroth gear pumps
- Through-drive horsepower transfer is 100% to the second pump
- VPV pumps are available with through-shaft versions for quick combinations
- Pressures to 210 bar (3050 PSI)
- Continuous speeds from 1000 to 1800 rpm
- A variety of fluids can be used: mineral oil, phosphate ester, and environmentally friendly fluids
- Controls include standard pressure compensation, remote pressure compensation, load sense, solenoid 2-pressure, and solenoid vented

GoTo Focused Delivery Program: Pumps

Variable vane pumps, pilot operated PSV

As a carryover from the Racine Fluid Power legacy program, Rexroth continues to support PSV series vane pumps for both new and replacement applications. The PSV series, otherwise known as the SV or Silent Vane product line, has a very large installed base around the world. These variable displacement vane pumps have proven themselves in the most demanding applications and they have built an excellent reputation with the OEM and user markets.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTopumps

Features

- Sizes 1.0 to 10.0 cubic inches
- Variable displacement vane pump with pilot operated control
- Subplate versions still available on PSV10/15/20/25 sizes
- Pressures up to 2000 psi

Detailed information:

- 9535233084 (PSV10/15)
- 9535233089 (PSV20/25)
- 9535233090 (PSV40)
- 9535233091 (PSV80/100)

GoTo Focused Delivery Program: Pumps

Radial piston pump, fixed displacement

R4

Hydraulic pumps of type R4 are integral check valve-controlled, self-priming radial piston pumps with fixed displacement. R4 pumps are designed for high pressure operation and long life.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTopumps

Features

- Sizes 1.6 to 20
- Radial piston pump with 3, 5 or 10 pistons
- Self-priming, valve-controlled
- Long bearing life due to hydro-dynamically lubricated plain bearings
- Optional combination with variable displacement vane and axial piston pumps

Detailed information:

- RA11263

GoTo Focused Delivery Program: Pumps

Radial piston pump, fixed displacement

R4-Mini

Hydraulic pumps of type R4 “mini” are integral check valve-controlled, self-priming radial piston pumps with fixed displacement. R4 mini pumps are designed for low flow, high pressure operation and long life.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTopumps

Features

- Sizes 0.4 to 2.0
- Radial piston pump with 3 pistons
- Very compact build
- Self-priming, valve-controlled
- Long service life due to hydro-dynamically lubricated plain bearings
- Optional combination with variable displacement vane pumps

GoTo Focused Delivery Program: Motors

Variable displacement motors

(A)A6VM

Variable displacement motor (A)A6VM in axial tapered piston rotary group of bent-axis design is available for open and closed circuit applications. It can be used in both mobile and industrial applications. The output speed is dependent on the flow of the pump and the displacement of the motor. The output torque increases with the pressure differential between the high-pressure and low-pressure side and with increasing displacement.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToMotors

Features

- Sizes 80, 107, 160
- Series 6
- Axial tapered piston, bent-axis design
- For use in mobile and stationary applications
- Wide control range, high speeds and torque

- Compact, robust motor with long service life
- Cost savings through elimination of gear shifts and possibility of using smaller pumps
- Wide selection of control devices; good starting characteristics

Detailed information:

- Series 6:
RE91604

Technical Data

Size			80	107	160
Nominal pressure		bar (PSI)	400 (5800)	400 (5800)	400 (5800)
Peak pressure		bar (PSI)	450 (6500)	450 (6500)	450 (6500)
Displacement ¹⁾	$V_{g \max}$	cm ³ (in ³)	80 (4.88)	107 (6.53)	160 (9.76)
	$V_{g 0}$	cm ³ (in ³)	0 (0)	0 (0)	0 (0)
Max. speed ²⁾ (while adhering to the maximum permissible flow)	$n_{\max}$ at $V_{g \max}$	rpm	3900	3550	3100
	$n_{\max}$ at $V_g < V_{g \max}$	rpm	6150	5600	4900
	$V_{g x} = 0.63 \times V_{g \max}$	cm ³ (in ³)	51 (3.11)	68 (4.15)	101 (6.16)
	$n_{\max}$ at $V_{g 0}$	rpm	7350	6300	5500
Max. flow	$q_{V \max}$	L/min (GPM)	312 (82)	380 (100)	496 (131)
Max. torque	$T_{\max}$ at $V_{g \max}$ ³⁾	Nm (lb-ft)	509 (375)	681 (502)	1019 (752)
Rotary stiffness $V_{g \max}$ to $V_{g/2}$	$C_{\min}$	Nm/rad (lb-ft/rad)	15500 (11432)	21000 (15489)	35300 (26036)
	$C_{\max}$	Nm/rad (lb-ft/rad)	47900 (35329)	65200 (48089)	105000 (77444)
Moment of inertia for rotary group	JTW	kgm ² (lb-ft ²)	0.0080 (0.190)	0.0127 (0.301)	0.0253 (0.600)
Maximum angular acceleration	a	rad/s ²	24000	19000	11000
Filling capacity	V	L (Gal)	1.2 (0.32)	1.5 (0.40)	2.4 (0.63)
Mass (approx.)	m	kg (lbs.)	34 (75)	47 (104)	64 (141)

1) The minimum and maximum displacement are infinitely adjustable, see ordering code, page 3.

(default settings for sizes 250 to 1000 unless specified in the order: $V_{g \min} = 0.2 \cdot V_{g \max}$, $V_{g \max} = V_{g \max}$).

2) $V_{g x} = 0.75 \times V_{g \max}$ (appr.)

3) Sizes 28 to 200: $\Delta p = 400$ bar (5800 PSI); sizes 250 to 1000: $\Delta p = 350$ bar (5100 PSI)

Caution: Exceeding the permissible limit values may result in a loss of function, a reduction in service life or in the destruction of the axial piston unit. Other permissible limit values with respect to speed variation, reduced angular acceleration as a function of the frequency and the permissible startup angular acceleration (lower than the maximum angular acceleration) can be found in data sheet RE90261.

GoTo Focused Delivery Program: Motors

Variable displacement motors

A10VM

Variable dual displacement motor A10VM in axial swashplate design is available for both open and closed circuit applications. Output speed is directly proportional to inlet flow and inversely proportional to motor displacement and output torque increases proportional to the pressure difference between high and low pressure sides and increasing displacement. Heavy duty design allows for high output speeds, long service life, and high power to weight ratio.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTomotors

Features

- Size 45 & 63
- Axial piston swashplate design
- Open and closed circuit
- High permissible output speeds

GoTo Focused Delivery Program: Motors

Fixed displacement motors

(A)A2FM

Fixed motor with axial tapered piston rotary group of bent axis design A(A)2FM, is available for hydrostatic drives in open and closed circuits. For use in mobile and stationary application areas, the output speed is dependent on the flow of the pump and the displacement of the motor. The output torque increases with the pressure differential between the high and low pressure sides. Careful selection of the displacements offered, permit sizes to be matched to practically every application.

For complete engineering and design information:

GoTo™ Graduated Lead Times available for quantities exceeding the standard GoTo max. quantity!

1) "Shipment" defined as – not to exceed the time from receipt of order to Bosch Rexroth Hydraulics to shipment ex-factory (Bosch Rexroth plant location).

GoTo Focused Delivery Program: Motors

Fixed displacement motors

A10FM

Fixed displacement axial piston motor A10FM in swashplate design is available for both open and closed circuit applications. For use in a wide-array of mobile and industrial applications, the well-proven A10-rotary group design boasts a high power to weight ratio along with long service life and low noise levels. The output speed is proportional to the inlet flow and torque increases with the pressure differential between the high and low pressure sides.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTomotors

Features

- Sizes 23 to 63
- Axial piston swashplate design
- Open and closed circuit
- High permissible output speeds

Detailed information:

- RE91172

GoTo Focused Delivery Program: Motors

External gear motors

AZMF

Bosch Rexroth has been involved with the design, development and manufacture of gear motors for many decades. Well-proven designs, the use of specially developed materials, constant testing and sophisticated mass production techniques ensure products of the very highest quality.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTomotors

Features

- Sizes 8 to 22 cc
- High pressures with small installation space and low weight
- Wide speed ranges
- Wide viscosity and temperature ranges
- Reversible motors for 2- and 4-quadrant operation
- Plain bearings for high loads
- Consistently high quality owing to large-scale production
- Many design variants available

Detailed information:

- RA14025

GoTo Focused Delivery Program: Motors

Radial piston motors

MCR

The MCR radial piston motors are low-speed high-torque hydraulic motors which operate according to the multiple-stroke principle. The relationship between roll diameter and cam profile is optimized inside the central power unit. This results in the best possible balance of forces between piston and cam path and simultaneously extends the service life. The step-piston power unit or high-displacement power unit yields a very compact drive unit with high power density. MCR motors can be used both in open as well as in closed circuits.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTomotors

Features

- Sizes 160, 225, 255, 280, 325, 365, 400, 820
- Compact, robust design
- Uniform concentric running, even at very low speeds
- Reversible
- High Radial forces permissible on the output shaft
- Sealed tapered roller bearing

GoTo Focused Delivery Program: Motors

High torque vane motors

Rineer MV015 Series

Bosch Rexroth Rineer MV015 Series Hydraulic Vane Motors provide high torque at start & stall, medium speed, and reliability in demanding applications. The patented Vane-Crossing-Vane design allows for high power-to-weight ratio, improved mechanical & volumetric efficiency. The rotating group is hydraulically balanced internally, resulting in no significant loads induced on the motor bearings which contribute to long service life. A variety of displacements & configurations are available on the GoTo Program.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTomotors

Features

- Patented Vane-Crossing-Vane design
- High torque at start & stall
- Speed to 2000 rpm continuous & 2600 rpm intermittent
- Operating pressure to 207 bar continuous
- Can conform to SAE C mounting specification
- High power-to-weight ratio
- Reliability in heavy duty & demanding applications
- Variety of displacements

GoTo Focused Delivery Program: Check Valves

Check valves, cartridge type

M-SR

M-SR check valves are cartridge assemblies for use in manifold applications. Flow capacities of 8 GPM – 106 GPM over six cartridge sizes permit a broad application potential. Both the right angle version “KE” or straight through version “KD” feature guided poppets with varying biasing spring options. M-SR check valves can be secured in a manifold utilizing a BSP or SAE plug (pressure limits applicable). The cavity is a relatively straight bore, therefore complicated tooling is not required.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTocheck

Features

- Sizes 10 to 30
- For block installations:
 - Right-angled valve (“KE”)
 - Straight valve (“KD”)
- Leak-free isolation in one direction
- Plug screw with pipe thread or metric ISO thread
- Various cracking pressures

Detailed information:

- RE20380

GoTo Focused Delivery Program: Check Valves

Filling valve – sandwich plate

ZSF

The valve type ZSF is a pilot operated check valve in sandwich plate design. It is used for the leakage-free isolation of pressurized working circuits (e.g. pressing cylinders). Due to its favorable flow characteristics and the low cracking pressure of the main poppet, it is particularly suitable on presses.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTocheck

Features

- Sizes 32 to 200
- Pilot operated check valve in sandwich plate design
- With or without pre-opening, optional
- Control by built-on directional spool valve or directional seat valve, optional
- Integrated high-pressure connection (size 32 to 160)
- Integrated throttle check valve (size 200)

Detailed information:

- RE20478

GoTo Focused Delivery Program: Check Valves

Check valve, hydraulically pilot operated

SV & SL

The SV and SL valves are hydraulic pilot operated check valves of poppet type design which may be opened to permit flow in the reverse direction. These valves are used for the isolation of operating circuits which are under pressure, i.e. as a safe guard against the lowering of a load when a line break occurs or against creeping movement of hydraulically locked actuators. The valve basically comprises of the housing, the poppet, a compression spring, the control spool as well as optional decompression feature as a ball poppet valve.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTocheck

Features

- Sizes 10 to 30
- For subplate mounting
- Connection location to ISO 5781
- With internal SV or external SL pilot oil drain
- With or without decompression feature, optional
- Version with decompression feature for dampened decompression (minimizing possible pressure shocks)

Detailed information:

GoTo Focused Delivery Program: Check Valves

Check valves – sandwich module design

Z1S

Valve type Z1S is a direct operated check valve of sandwich plate design. They provide line contact closure in one direction and allows free flow in the opposite direction. The check function can be in one of several ports, or dual ports. The check function orientation can also be defined by model coding.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTocheck

Features

- Size 6 and 10
- For mounting:
 - Size 6: Porting pattern according to ISO 4401-3, NFPA T3.5.1M R1, and ANSI B 93.7 D 03
 - Size 10: Porting pattern according to ISO 4401-5, NFPA T3.5.1M R1, and ANSI B93.7 D 05
- Various isolating functions
- Various cracking pressures
- Check valve made of carbon fiber-reinforced plastic
- Excellent compatibility with various hydraulic fluids

GoTo Focused Delivery Program: Check Valves

Piloted-to-open check valves – sandwich module

Z2S

Models Z2S are pilot operated check valves in a sandwich plate design. They provide line contact closure in one or two actuator ports, even during idle periods. Piloted to open, utilizing a pressure signal from the opposite actuator port provides a self-contained function.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTocheck

Features

- Sizes 6 to 22
- Porting pattern according to ISO 4401-3, 5, 7, 8; NFPA T3.5.1M R1, and ANSI B93.7 D 03, D 05, D 07, D 08
- For the leak-free isolation of one or two actuator ports
- Various cracking pressures

GoTo Focused Delivery Program: Directional Valves

Directional poppet valves, direct operated, solenoid actuation SED & SEW

Directional control valves, model SED and SEW, are direct (SED) or lever (SEW) actuated directional poppet valves with solenoid actuation. They control the start, stop, and direction of fluid flow. Poppet valves, or seat valves, provide a line contact closure for applications where spool valve leakage or silting is not desirable.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTodirectional

Features

- Size 6 and 10
- For mounting:
 - Size 6: Porting pattern according to ISO 4401-3, NFPA T3.5.1M R1, and ANSI B 93.7 D 03
 - Size 10: Porting pattern according to ISO 4401-5, NFPA T3.5.1M R1, and ANSI B93.7 D 05
- Blocked port is leak-free when completely shifted
- Solenoids with detachable coil
- Pressure-tight chamber does not have to be opened for changing the coil (type SED)
- Reliable switching when under pressure over longer periods of standstill
- CSA certified part numbers available in size 6

GoTo Focused Delivery Program: Directional Valves

Directional spool valves, direct operated with manual actuation

4WMM & 4WMR

Directional valves type WMM are lever operated directional spool valves. They control the start, stop, and direction of a flow. These directional valves basically consist of housing; lever; control spool; return springs. A full array of spools are possible with variations for detented operation on both 2-position or 3-position functions. Flow and pressure rates from 4000 PSI to 5000 PSI and 16 GPM to 32 GPM cover a wide range of applications.

For complete engineering and design information:

1) "Shipment" defined as – not to exceed the time from receipt of order to Bosch Rexroth Hydraulics to shipment ex-factory (Bosch Rexroth plant location).

GoTo Focused Delivery Program: Directional Valves

Directional spool valves, direct operated with solenoid actuation

WE

Directional valves type WE are solenoid operated directional spool valves. They control the start, stop, and direction of a flow. These directional valves basically consist of housing; one or two solenoids; control spool; and no, one, or two return springs. A full array of spools are possible with variations in voltage and electrical connection, all within the program. Flow and pressure rates from 4000 PSI to 5000 PSI and 21 GPM to 32 GPM cover a wide range of applications.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToDirectional

Features

- Sizes 6 to 10
- For subplate mounting:
 - Size 6: Porting pattern according to ISO 4401-3, NFPA T3.5.1M R1, and ANSI B93.7 D 03
 - Size 10: Porting pattern according to ISO 4401-5, NFPA T3.5.1M R1, and ANSI B93.7 D 05
- Wet-pin AC or DC solenoids
- Solenoids with detachable coil
- Electrical connection as individual or central connection
- Optional spool position monitoring (RE24830)
- Smooth switching characteristics ³⁾
- CSA certified part numbers available in all sizes

Detailed information:

- Size 6:
RE23178 ²⁾
- Size 10:
RA23183 ³⁾
RE23327 ⁵⁾
RE23351 ⁶⁾

Technical Data

Size	6			
Version	1)	2)	3)	4)
Operating pressure $p_{\max}$ bar (PSI)	315 (4600)	350 (5100)	350 (5100)	315 (4600)
Flow $q_{v \text{ nom}}$ l/min (GPM)	60 (15.8)	80 (21)	60 (15.8)	60 (15.8)

Size	10		
Version	3)	5)	6)
Operating pressure $p_{\max}$ bar (PSI)	315 (4600)	315 (4600)	315 (4600)
Flow $q_{v \text{ nom}}$ l/min (GPM)	100 (26.4)	120 (32)	120 (32)

1) Standard valve, size 6 (DC solenoid only)

2) Heavy duty valve

3) Soft switch valves

4) Reduced electrical power consumption

5) Standard valve, size 10

6) 5-chamber version (DC solenoid only)

“=AN”: solenoid identity is to ANSI guidelines, wherein “A” solenoid energized produces flow from “P→A”

“SO 407”: indicates the solenoid power consumption is 8 watts

“K72L”: defines an M12 molded electrical connection on each solenoid vs a single connection to a conduit/central box arrangement

GoTo™ Graduated Lead Times available for quantities exceeding the standard GoTo max. quantity!

1) "Shipment" defined as – not to exceed the time from receipt of order to Bosch Rexroth Hydraulics to shipment ex-factory (Bosch Rexroth plant location).

GoTo Focused Delivery Program: Directional Valves

Directional spool valves, direct operated with solenoid actuation

5-WE (5-chamber version)

The 5-chamber directional valve type 5-WE is a solenoid operated directional spool valve influencing the switching time. It controls the start, stop and direction of a flow. Directional spool valves connect or isolate the connections by moving a control spool in a housing bore.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToDirectional

Features

- Size 10
- Porting pattern according to ISO 4401-05-04-0-05 and NFPA T3.5.1 R2-2002 D05
- Wet-pin DC solenoids with detachable coil
- Solenoid coil can be rotated by 90°
- Coil can be replaced without opening pressure tight chamber
- Single or double valve mating connectors (see RE08006)

Detailed information:

- RE23352

GoTo Focused Delivery Program: Directional Valves

Directional spool valves, pilot operated with solenoid actuation

4WEH

Directional valves type WEH are solenoid operated directional spool valves. They control the start, stop, and direction of a flow. These pilot operated directional valves consist of a pilot control valve and main stage with spring or hydraulic centering options. Additionally, the pilot and drain configuration may be selected. A full array of spools are possible with variations in voltage and electrical connection, all within the program. Flow and pressure rates from 4000 PSI to 5000 PSI and 42 GPM to 120 GPM cover a wide range of applications.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTodirectional

Features

- Sizes 10 to 22
- Porting pattern according to DIN 24340 form A and ISO 4401-5, 7, 8; NFPA T3.5.1M R1, and ANSI B93.7 D 05, D 07, D 08
- Wet-pin AC or DC solenoids
- Spring and/or pressure return of the main spool to its initial position
- Spring centering (size 10, 16 & 22)
- Spring or pressure centering (sizes 16 & 22)
- Electrical connection as individual connection or central connection
- Optional switching time adjustment
- Stroke limitation of the main spool, optional
- CSA certified part numbers available in all sizes

GoTo Focused Delivery Program: Directional Valves

Directional shut-off valves, internally pilot operated, externally pilot operated

Z4WEH

Valve type Z4WEH are directional spool valves with electrohydraulic actuation. They control the start and stop of a flow, and function as an emergency on-off isolating valve or on-off isolating/bypass valve, primarily used for servo/proportional systems.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTodirectional

Features

- Sizes 10
- Directional spool valve, pilot operated
- 2 types of actuation:
 - Electrohydraulic (type WEH)
 - Hydraulic (type WH) – available
- Function as shut-off through-valve or shut-off/through valve/short-circuit valve
- Free flow in P and T in every spool position
- Porting pattern to ISO 4401-05-04-0-05
- Wet-pin DC or AC voltage solenoids, optional
- Manual override, optional
- Electrical connection as individual or central connection
- Switching time adjustment, optional
- Stroke adjustment of main spool, optional
- Inductive position switch and proximity sensors

GoTo Focused Delivery Program: Directional Valves

Logic valves for direction functions

LC + LFA

Logic valves consist of a cartridge (LC) and cover (LFA) which are ordered separately. The directional valve cartridges have area ratios to suit application needs. LC..A has a 50% or (2:1) area ratio. LC..B has a 7% (14.3:1) area ratio. Cracking pressure is determined by spring code (ex: 00 = no spring, 10 = 1 bar). The LC without damping nose has option E. The LC with damping nose has option D. The LFA for direction functions have many configurations (D, WEA, GWA, KWA) with various options. When the cover accepts a directional pilot valve, this (4WE6, SEW, SED) must be specified separately. The standard LFA includes metric fasteners.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTodirectional

Features

- Sizes 16, 25, 32, 40, 50, 63
- Mounting cavity and connections to DIN ISO 7368
- LC has 2 area ratios, various springs, optional damping nose
- Control cover with remote control port
- Control cover for mounting directional spool or poppet valve

Detailed information:

- RE21010 (LC..A, B)

GoTo Focused Delivery Program: Directional Valves

Logic valves for pressure functions

LC + LFA

Logic valves consist of a cartridge (LC) and cover (LFA) which are ordered separately. The LC..DB is a pressure relief cartridge. Cracking pressure is determined by spring code (ex: 40 = 4 bar). The LC without damping nose has option E. The LC with damping nose has option D. The LFA for pressure functions have many configuration. LFA..DB includes a manual relief valve. LFA..DBEM has mounting provision for a proportional relief valve. The standard LFA includes metric fasteners.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTodirectional

Features

- Sizes 16, 25, 32, 40
- Mounting cavity and connections to DIN ISO 7368
- LC has optional damping nose
- Control cover with DB relief cartridge
- Control cover for mounting DBET proportional relief valve

Detailed information:

- • RA21050 (LC..DB)

Technical Data					
Size		16	25	32	40

1) "Shipment" defined as – not to exceed the time from receipt of order to Bosch Rexroth Hydraulics to shipment ex-factory (Bosch Rexroth plant location).

GoTo Focused Delivery Program: Pressure Control Valves

Pressure relief valves, direct operated
DBD

The DBD pressure relief valves are direct operated type relief valves. They are used to limit the pressure in a hydraulic system. DBD type relief valves offer line contact sealing for minimal leakage at closure and a full array of pressure capacities are available.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToPressure

Features

- Sizes 6 to 20
- For threaded connection (“G”)
- As cartridge valve (“K”)
- Optional adjustment types:
 - Screw with hexagon socket and protective cap
 - Rotary knob / hand wheel

Detailed information:

- RE25402

GoTo Focused Delivery Program: Pressure Control Valves

Pressure relief valves

DZT

Type DZT pressure relief valves are seat design remote control valves and allow for the limitation of the system pressure. These valves are basically used as pilot control valves for the indirect control of major flow.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToPressure

Features

- Sizes 6
- Directly operated valve for the limitation of the system pressure
- Application as pilot control valve
- For plate and control panel mounting

Detailed information:

- RE25724

Technical Data

GoTo Focused Delivery Program: Pressure Control Valves

Pressure relief valves – direct operated

ZDBD & Z2DBD

ZDBD and Z2DBD are direct operated relief valves with a sandwich mount design. Several pressure ranges are available, up to 350 bar. The improved performance in a very cost effective design made for demanding mobile and industrial applications.

ZDBD models have a single port pressure relief in ports A, B or P. Z2DBD models have dual port relief, for (A-T, B-T) or a cross port relief function.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToPressure

Features

- Size 6, Size 10
- Nominal flow to 60, 120 Lpm
- Several pressure ranges, up to 350 bar
- Single port relief: DA, DB, or DP
- Dual port relief: DC (A-T, B-T) or DD (A-B, B-A)
- Mounts on ISO 4401-3, ANSI B93.8 D03; or ISO 4401-5, ANSI B93.8 D05
- Includes hole for locating pin R900005694 (separate order)
- Hex screw adjustment type

GoTo Focused Delivery Program: Pressure Control Valves

Pressure relief valves – sandwich module, pilot operated ZDB & Z2DB

Pressure relief valve types ZDB and Z2DB are pilot sandwich type pressure controls. ZDB versions offer single port pressure control, while Z2DB models offer dual port pressure control. Z2DB models can be configured as either port relief or cross port relief. The ZDB program offers multiple spring options.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToPressure

Features

- Sizes 6 and 10
- For mounting:
 - Size 6: Porting pattern according to ISO 4401-3, NFPA T3.5.1M R1, and ANSI B93.7 D 03
 - Size 10: Porting pattern according to ISO 4401-5, NFPA T3.5.1M R1, and ANSI B93.7 D05
- Four pressure ratings: 50 bar (725 PSI), 100 bar (1450 PSI), 200 bar (2900 PSI), and 315 bar (4600 PSI)
- Five pressure relief functions:
 - $A \rightarrow T$; $P \rightarrow T$; $B \rightarrow T$; $A \rightarrow T$ as well as $A+B \rightarrow T$; $A \rightarrow B$ and $B \rightarrow A$
- Adjustment type:
 - Hex screw with protective cap

GoTo Focused Delivery Program: Pressure Control Valves

Pressure reducing valve, direct operated

DR

The valve type DR 6 DP is a direct operated pressure reducing valve in 3-way design, i.e. with pressure limitation of the secondary circuit.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToPressure

Features

- For subplate mounting
- Porting pattern according to DIN 24340 form A
- Porting pattern according to ISO 4401-03-02-0-05 and NFPA T3.5.1 R2-2002 D03 (with locating hole)
- 4 adjustment types for pressure adjustment, optionally:
 - Rotary knob
 - Hex screw with protective cap
 - Lockable rotary knob with scale
 - Rotary knob with scale
- 5 pressure ratings
- Check valve, optional

Detailed information:

- RE26564

GoTo Focused Delivery Program: Pressure Control Valves

Pressure-reducing valves – pilot operated

Z3DR6

Z3DR 6 is a new sandwich pilot operated, 3-way pressure reducing valve. Pressure reducing-relieving in port P is available in (4) pressure settings 50, 100, 200 and 315 bar.

The Z3DR 6 has a low pressure drop, reduced hysteresis, improved stability, higher pressure rating. The cost effective design suitable for demanding mobile and industrial applications.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTopressure

Features

- Size 6
- Nominal flow to 60 Lpm
- Pilot operated, reducing in P-port (model VP)
- Four pressure ranges 50, 100, 200, 315 bar
- Improved performance and stability
- Mounts on ISO 4401-3, ANSI B93.8 D03
- Hex screw adjustment type with protective cap

Detailed information:

GoTo Focused Delivery Program: Pressure Control Valves

Pressure-reducing valves – pilot operated

Z3DR10

Z3DR 10 is a new sandwich pilot operated, 3-way pressure reducing valve. Maximum pressure is 350 bar. Pressure reducing-relieving is available in (4) pressure settings 50, 100, 200 and 315 bar at controlled port. VP models reduce pressure in P-port. Adjustment-2 has an internal hex. MS models include a measuring port on side. SO30 models include X and Y ports, for use with pilot operated (directional valve) applications. Z3DR 10 features a high pressure, cast housing with low pressure drop and long life. It has improved stability, reduced hysteresis, and superior pressure regulation under changing flows. The cost effective design is suitable for demanding mobile and industrial applications.

1) "Shipment" defined as – not to exceed the time from receipt of order to Bosch Rexroth Hydraulics to shipment ex-factory (Bosch Rexroth plant location).

GoTo Focused Delivery Program: Flow Control Valves

Throttle valves and throttle check valves

MG

Valve model MG is a pressure and viscosity dependent throttle valve. Model MG (throttle valve) throttles in both flow directions.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTocheck

Features

- Size 10
- For in-line installation
- Related to pressure and viscosity
- Throttling in both directions of flow

Detailed information:

- RA27219

Technical Data

GoTo Focused Delivery Program: Flow Control Valves

Double throttle check valves – sandwich module

Z2FS

Flow control valves, Model Z2FS, are double throttle/check sandwich type valves. They restrict flow to or from actuator ports (A & B) of a directional valve. Two throttle/check valves, symmetrically arranged in the housing, restrict flow with adjustable throttles in one direction while providing free flow in the opposite direction.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToflow

Features

- Sizes 6 to 22
- For mounting:
 - Size 6: Porting pattern according to ISO 4401-3, NFPA T3.5.1M R1, and ANSI B93.7 D 03
 - Size 10: Porting pattern according to ISO 4401-5, NFPA T3.5.1M R1, and ANSI B93.7 D 05
 - Size 16: Porting pattern according to ISO 4401-7, NFPA T3.5.1M R1, and ANSI B93.7 D 07
 - Size 22: Porting pattern according to ISO 4401-8, NFPA T3.5.1M R1, and ANSI B93.7 D 08
- For limiting the main or pilot flow of one or two actuators
- Meter-in or meter-out throttling
- Adjustment type:
 - Softscrew with locknut

GoTo Focused Delivery Program: Flow Control Valves

2-way flow control valves, pressure compensated

2FRM

Pressure compensated flow controls Model 2FRM are two-way restrictive-style flow regulators. They accurately control flow, independent of changes in fluid viscosity or pressure drop across the valve. This valve maintains a constant actuator speed independent of changes in load induced pressure. Sharp edged throttle openings reduce the influence of flow variations from temperature change.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToflow

Features

- Sizes 6, 10, and 16
- For subplate mounting:
 - Size 6: Porting pattern according to ISO 6263-03 and NFPA T3.5.1M R1 2 FO 3
 - Size 10: Porting pattern according to ISO 6263-06-2 and NFPA T3.5.1M R1 2 FO 6
 - Size 16: Porting pattern according to ISO 6263-07-2 and NFPA T3.5.1M R1 2 FO 7
- Manual dial adjustment
- With external closure of the pressure compensator, optional (size 6)
- Check valve, optional (size 6)
- Pressure compensator stroke limitation for reducing start-up jumps, optional (size 10)

GoTo Focused Delivery Program: Proportional Valves

Proportional directional valves, direct operated with electrical position feedback

4WRP & 4WRPE (Series 2X)

The 4/2 and 4/3 proportional valves are directly controlled components of subplate mounting design. They are actuated by proportional solenoids with an integrated linear feedback to assure accurate positioning related to a command signal. The valves are available with either external control electronics (model WRP) or by integrated valve electronics (model WRPE).

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToProportional

Features

- Sizes 6 and 10
- For subplate mounting:
 - Size 6: Porting pattern according to ISO 4401-3, NFPA T3.5.1M R1, and ANSI B 93.7 D 03
 - Size 10: Porting pattern according to ISO 4401-5, NFPA T3.5.1M R1, and ANSI B93.7 D 05
- Control of the direction and magnitude of a flow
- Actuation through control solenoid
- Position sensing of the control spool via an inductive position transducer
- Series with/without integrated electronics
- Characteristic curves with and without inflection

Detailed information:

GoTo Focused Delivery Program: Proportional Valves

High-response directional valves, direct operated with electrical position feedback

4WRPE (Series 3X)

4WRPE10 Series 3X is high performance, direct operated, proportional valve. It is suitable for demanding open loop and closed loop applications like position, velocity, and pressure control. It is even more robust than the previous design.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToproportional

Features

- Size 10
- Nominal flow at 10 bar drop: 50 to 80 Lpm
- Spool in housing
- Direct operated by onboard electronic solenoids
- Standard 7-pin connector
- Mounts on ISO 4401-3, ANSI B93.8 D03

Detailed information:

GoTo Focused Delivery Program: Proportional Valves

High-response directional valves, direct operated with electrical position feedback

4WRPH & 4WRPEH (Series 2X)

4WRPH and 4WRPEH type proportional directional valves offer fast response, minimal hysteresis, and are excellent performers in closed loop applications. Available with or without on-board electronics, these valves may be used in a variety of applications and environments. The robust design is also applicable to circuits where vibration may be a concern.

For complete engineering and design information:

GoTo Focused Delivery Program: Proportional Valves

High-response directional control valves, direct operated with electrical position feedback and OBE

4WRREH

4WRREH type proportional directional valves offer fast response and minimal hysteresis with control electronics integrated into the valve. In the case of control deviations, the double-stroke solenoid is activated which adjusts the control spool by means of changed solenoid force. For use in electrohydraulic controls in production and test systems.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToProportional

Features

- Size 6
- For subplate mounting
 - Porting pattern according to ISO 4401-03-02-0-05
- Gate valve, directly operated, with steel sleeve
- Actuation through proportional double-stroke solenoid with position control
- Spool and sleeve in servo quality

GoTo Focused Delivery Program: Proportional Valves

Proportional directional valve, direct operated without electrical feedback

4WRA & 4WRAE

The WRA(E) direct operated proportional valve without integral feedback is available with or without on-board electronics (OBE). Individual valve amplifiers are available for the non-OBE version. Postive overlap spools reduce leakage at center and OBE models can be configured to either a voltage or current command.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToproportional

Features

- Sizes 6 and 10
- For subplate mounting:
 - Size 6: Porting pattern according to ISO 4401-3, NFPA T3.5.1M R1, and ANSI B 93.7 D 03
 - Size 10: Porting pattern according to ISO 4401-5, NFPA T3.5.1M R1, and ANSI B93.7 D 05
- Control of the direction and magnitude of a flow
- Proportional solenoid operation
- Spring-centered control spool
- Different spool overlaps possible
- Integral electronics (OBE) for type 4WRAE

1) "Shipment" defined as – not to exceed the time from receipt of order to Bosch Rexroth Hydraulics to shipment ex-factory (Bosch Rexroth plant location).

GoTo Focused Delivery Program: Proportional Valves

Proportional directional control valves, direct operated 4WRA(E)B

4WRAB6 type direct operated proportional valves are available with or without on-board electronics (OBE). Suitable for open loop applications, the WRAB6 does not have integral feedback; however, provides proportional flow output dependant on a commanded value. The WRAB6 may also be used with a DC switching signal, if the application requires throttled shifting without full proportional control.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToproportional

Features

- Size 6
- Direct operated proportional directional control valves, which control both the direction and volume of a fluid flow
- Mounts on standard ISO 4401-3, NFPA T3.5.1MR1 D 03 and ANSI B 93.7 D 03 interface
- Two piece solenoid design with removable coils
- Integrated electronics available
- For subplates, see RE45052

Detailed information:

- RA29057

Technical Data

Size				6
Operating pressure	Ports A, B, P	$p_{\max}$	bar (psi)	350 (5100)
	Port T	$p_{\max}$	bar (psi)	210 (3100)
Maximum flow			l/min (GPM)	30 (8)
Maximum hysteresis			%	3.5
Step response	0 to 100%	$T_u + T_g$	ms	40
Supply voltage		U	vdc	12V ($\pm 10\%$)
Associated electronic amplifier cards (some restrictions apply)				MDSD*

* The MDSD1 or MDSD will operate the 4 WRA B../G12 with 14 to 28 vdc from the power supply. The MDSD can be used with 10 to 14 vdc power, but valve performance may be affected. At higher temperatures, increased solenoid resistance may reduce the available flow. An amplifier is not required when using the 4 WRA B../G12 as a non-proportional (switching) valve at 12 vdc $\pm 10\%$.

GoTo Focused Delivery Program: Proportional Valves

Proportional directional valve, direct operated with electrical position feedback

4WREE

WRE(E) direct operated proportional directional control with integral feedback are available with on-board electronics (OBE). Positive overlap spools reduce leakage at center, while underlap spools can be utilized for closed-loop functions. Individual amplifiers are available, while OBE models are possible with either a voltage or current command.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToproportional

Features

- Sizes 6 to 10
- For mounting:
 - Size 6: Porting pattern according to ISO 4401-3, NFPA T3.5.1M R1, and ANSI B 93.7 D 03
 - Size 10: Porting pattern according to ISO 4401-5, NFPA T3.5.1M R1, and ANSI B93.7 D 05
- Control of the direction and magnitude of a flow
- Proportional solenoid operation
- Spring-centered control spool
- Different spool overlaps possible
- Integrated control electronics (OBE) for type 4WREE

GoTo Focused Delivery Program: Proportional Valves

High-response directional valves, pilot operated with electrical position feedback

4WRVE

Pilot operated proportional directional valve type 4WRVE offers integral position feedback on both pilot and mainstage for dynamic response plus greater accuracy. On-board electronics (OBE) and 12-pin connectors permit power and command all to be accomplished on the valve. Underlapped main spools and high performance pilot permit the WRVE to be an excellent candidate into applications requiring closed loop control of pressure, force, and velocity.

GoTo Focused Delivery Program: Proportional Valves

High-response proportional directional valves, pilot operated 4WRKE

The 4WRKE is a pilot operated proportional directional valve with position feedback on the main stage. The onboard electronics (OBE) has a standard 7-pin connector for command, spool feedback, and 24V power. Overlapped spools have a spring centered fail-safe position. 4WRKE is normally used for open loop applications where higher repeatability is more important, also for lift, transfer, or clamping applications.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToproportional

Features

- Size 25
- Porting pattern to ISO 4401-8; NFPA T3.5.1M R1; ANSI B93.7 D09
- Controls direction and magnitude of flow by analog command
- Spool position feedback on main stage for low hysteresis
- Overlapped spool
- Integrated amplifier

GoTo Focused Delivery Program: Proportional Valves

High-response directional valves, pilot operated with electrical position feedback

4WRLE Series 4X

Pilot operated, proportional directional valves type 4WRLE are high response control valves with spool position feedback. The series-4X has a new onboard electronics OBE that improves performance and reliability. It has an increased temperature range, and it's even more robust to mechanical shock and vibration. The optimized spool and housing allow higher nominal flow ratings in all sizes. The improved dynamic response is well suited for a wide range of demanding closed loop applications, involving pressure, force, position, and velocity control.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToproportional

Features

- Size 10 to 25
- Higher nominal flows per size, 60 to 400 Lpm
- Maximum pressure to 350 bar
- Improved dynamic performance and stability
- Even more robust onboard electronics
- Porting pattern according to ISO 4401-05, 07, 08

GoTo Focused Delivery Program: Proportional Valves

Proportional DIN throttle valve

2WFCE Series 1X

2WFCE is a DIN cavity proportional throttle valve with Onboard electronics OBE. Maximum flow increased in all sizes. Maximum pressure is 420 bar. Response and stability improved, when compared to FESXE.

2WFCE model A1 (10 vdc) can easily replace most FESXE (7-pin connector). FEE and FESE use 12-pin connectors. See data sheet RE26871 regarding wiring changes or 12-pin connector options.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToProportional

Features

- Size 16 to 50
- Nominal flow 1500 lpm @ 5 bar Δp
- Pilot operated
- 420 bar
- Improved performance and stability
- Bi-directional flow (x port to inlet)

Detailed information:

- RE26871

GoTo Focused Delivery Program: Proportional Valves

Proportional cartridge throttle valve, with inductive position transducer

FESX

Model FESX proportional throttle valves are pilot operated and in “cartridge” design. This results in their compact form despite high flow rates. The electronics, which take the form of an external valve amplifier in Europe card format, trigger the solenoid of the pilot valve and thus control the position of the main stage. Hysteresis is <0.2% and a position accuracy of >0.5% is achieved.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToproportional

Features

- Sizes 16...50
- Pilot operated throttle valves with inductive position transducer
- Design: cartridge type DIN 24342, ISO/DIS 7368, control oil external X and Y
- Adjustable via the position-controlled main stage by means of the position transducer and the external valve electronics
- Hysteresis < 0.2%, positioning accuracy < 0.5%

Detailed information:

GoTo Focused Delivery Program: Proportional Valves

Proportional pressure relief valves with position feedback (LvdT AC/AC)

DBETBX

DBETBX proportional pressure relief valves limit pressure for piloting applications requiring high performance. Pressure is directly controlled by changing the proportional solenoid position.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToProportional

Features

- Size 6
- Directly operated valves with position feedback for limiting system pressure
- Adjustable through the position of the armature against the compression spring
- Position-controlled at a high magnetic force, minimal hysteresis <0.3%
- Pressure limitation to a safe level even with faulty electronics (solenoid current $I > I_{\max}$)
- For subplate attachment, mounting hole configuration to ISO 4401-03-02-0-94

Detailed information:

- RE29150

Technical Data

Size	6	
Maximum set pressure (at $Q = 1 \text{ l/min [0.26 GPM]}$)	bar (psi)	180 (2600)
Minimum pressure (at $Q = 1 \text{ l/min [0.26 GPM]}$)	bar (psi)	4 (58)
		Note: At $Q_{\max} = 3 \text{ l/min (GPM)}$ the pressure levels stated here increase
Maximum working pressure (at $Q = 1 \text{ l/min [0.26 GPM]}$)	Port P bar (psi)	315 (4600)
Maximum pressure	Port T bar (psi)	≤ 2 (29)
Maximum solenoid current	$I_{\max}$	3.7

GoTo Focused Delivery Program: Proportional Valves

Proportional pressure relief valve, pilot operated DBE6X

Type DBE6X proportional pressure relief valves are pilot operated pressure relief valves. The valves are actuated by means of a proportional solenoid. With these valves, the system pressure that needs to be limited can be infinitely adjusted in relation to the solenoid current.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToproportional

Features

- Size 6
- Pilot operated valves (pilot valves) for limiting system pressure (pilot oil internal only)
- Adjustable by means of the solenoid current
- Solenoid versions $I_{\max} = 0.8 \text{ A}$
- Pressure limitation to a safe level even with faulty electronics (solenoid current $I > I_{\max}$)
- For subplate attachment, mounting hole configuration to ISO 4401-03-02-0-94

Detailed information:

- RE29156

Technical Data

GoTo Focused Delivery Program: Proportional Valves

Proportional pressure relief valve, pilot operated

DBEE6

The pilot operated proportional pressure relief valves of the type DBEE are operated by means of a proportional solenoid. These valves are used to limit a system pressure. With these valves it is possible to steplessly adjust the system pressure to be limited depending on the electrical command value.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToProportional

Features

- Size 6
- Pilot operated valve for limiting a system pressure
- Operation by means of proportional solenoids
- Proportional solenoid with rotatable and detachable coil
- For subplate mounting
- Porting pattern according to ISO 4401-03-02-0-05 and DIN 24340

Detailed information:

- RE29258

Technical Data

Size			6
Maximum operating pressure	Port P; P1 – P2; A1 – A2; B1 – B2	bar (psi)	350 (5100)

GoTo Focused Delivery Program: Proportional Valves

Proportional pressure relief valves, with linear curve (LvdT AC/AC)

DBETFX

DBETFX proportional pressure relief valves are direct operated valves with position feedback for limiting system pressure. The position of the valve cone is measured by the LvdT AC/AC position transducer, and the position of the cone-solenoid position is controlled by external trigger electronics, resulting in a linear curve.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToProportional

Features

- Size 6
- Directly operated valves with position feedback for limiting system pressure
- Adjustable through the set position of the cone against main spring
- Position-controlled, linear curve with minimal hysteresis
- Pressure limitation to a safe level even with faulty electronics
- For subplate attachment, mounting hole configuration to ISO 4401-03-02-0-94

Detailed information:

GoTo Focused Delivery Program: Proportional Valves

Proportional pressure relief valve

DBETA

DBETA proportional pressure relief valves are for high performance applications up to 5 Lpm. Combine DBETA with logic valves (like LC + LFA...DB) for high flow pressure circuits. Pilot remote pressure control on axial piston pumps (DRG control A4V, A10V, A15V).

The integral pressure transducer is factory calibrated to on-board electronics with a standard 7-pin analog interface. DBETA is a closed loop pressure design for outstanding linearity and accuracy, even while fluid viscosity and flows change. Sensor fault detection switches valve to a 0v condition. Simple installation, no user software or bus.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToProportional

Features

- Size 6
- Nominal Pressure 200, 350 Bar
- Maximum Flow 5 Lpm
- Integral pressure sensor, controller, and amplifier

GoTo Focused Delivery Program: Proportional Valves

Proportional pressure reducing valves, pilot operated DRE6X

Model DRE6X proportional pressure reducing valves are pilot operated with a 3-way main stage. The pilot valve (pressure relief valve pilot stage) is supplied internally with a controlled flow of pilot oil. The valves are actuated by a proportional solenoid acting against a spring. The solenoid armature is cushioned to aid stability.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToProportional

Features

- Size 6
- Pilot operated valves for reducing system pressure at the consumer (pilot oil internal only)
- 3-way version (P–A/A–T), $p_{\min} = p$ in T
- Adjustable by means of the solenoid current
- Solenoid type $I_{\max} = 0.8$ A
- Pressure limitation to a safe level even with faulty electronics (solenoid current $I > I_{\max}$)
- For subplate attachment, mounting hole configuration to ISO 4401-03-02-0-94
- Plug-in connector to DIN 43650-AM2 included in scope of delivery
- External trigger electronics with ramps and valve calibration (order separately)

1) "Shipment" defined as – not to exceed the time from receipt of order to Bosch Rexroth Hydraulics to shipment ex-factory (Bosch Rexroth plant location).

GoTo Focused Delivery Program: Proportional Valves

Proportional pressure reducing valves, pilot operated DRE(M) and DRE(M)E

Type DRE(M) and DRE(M)E valves are pilot operated pressure reducing valves, used to reduce operating pressure. Available without maximum pressure limitation (DRE.) or with maximum pressure limitation (DREM.) and with or without integrated control electronics. This valve reduces operating pressure by means of proportional solenoids.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToProportional

Features

- Size 10
- Valve for reducing an operating pressure
- Proportional solenoid with rotatable and detachable coil
- Linearized command value-pressure characteristic curve
- Maximum pressure limitation optional
- For subplate mounting:
 - Porting pattern according to ISO 5781

Detailed information:

- RE29276

Technical Data

Size		10	
Maximum working pressure	Port A and B	bar (psi)	
		315 (4500)	
	Port Y	bar (psi)	
		Separately and to the tank at zero pressure	
Maximum set pressure in channel A	Pressure rating (bar [psi]):	200 (2900)	315 (4500)
		bar (psi)	200 (2900) 315 (4500)
Minimum set pressure (command value = 0)	bar (psi)	2 (30)	
Maximum pressure limit	Pressure rating (bar [psi]):	200 (2900)	315 (4500)
		bar (psi)	230 (3300) 350 (5100)
Maximum flow	l/min (GPM)	200 (52.8)	
Operating voltage	V	24 DC	
Hysteresis	%	± 3.5 of the max. setting pressure	
Repeatability	%	< ± 2 of the max. setting pressure	
Linearity	%	± 2 of the max. setting pressure

GoTo Focused Delivery Program: Proportional Valves

Proportional pressure reducing valves, direct operated 3DREP & 3DREPE

3DREP6 is a pressure reducing/relieving valve for very low pressures in special applications. The dual solenoid model-C regulates port A or port B. The most common application is 25 bar (360 PSI) on the 4WRZ(E) 10..32 proportional directional valve. Pressure is directly controlled by changing current to a proportional solenoid by external amplifier or by integrated electronics (3DREPE6).

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToProportional

Features

- Size 6
- Porting pattern according to ISO 4401-3, NFPA T3.5.1M R, and ANSI B93.7 D 03
- Valve for reducing a system pressure
- Proportional solenoid operation
- For subplate mounting
- Integrated electronics (OBE) for type 3DREPE

Detailed information:

- RE29184

GoTo Focused Delivery Program: Proportional Valves

Proportional pressure reducing valve, pilot operated ZDREE

Valve of type ZDREE are pilot operated pressure reducing valves of sandwich plate design in 3-way variant, i.e. with pressure limitation of the actuator pressure. They are used for reducing a system pressure.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToproportional

Features

- Size 10
- Pilot operated valve for reducing a system pressure
- Actuation by proportional solenoid, which can be rotated
- Sandwich plate design
- Porting pattern to DIN 24340-A and ISO 4401
- Linear command value/pressure characteristic curve
- Integrated electronics (OBE) with type ZDREE, with low manufacturing tolerance of the command value/pressure characteristic curve

Detailed information:

- RE29279

Technical Data

Size			6
Maximum operating pressure	Port P1	bar (psi)	315 (4600)
	Ports P2; A; B; X	bar (psi)	350 (5100)
	Port T	bar (psi)	250 (3600)
	Port Y or L	bar (psi)	Line separately and at zero pressure to tank
Maximum set pressure in Port P1	Pressure rating to 200 bar (2900 PSI)	bar (psi)	200 (2900)
Permissible maximum flow		l/min (GPM)	80 (21.1)
Hysteresis		%	±3 of maximum set pressure
Supply voltage	Nominal voltage	VDC	24
Required fuses		A	2, slow-blowing
Inputs	Voltage	V	0 to 10

GoTo Focused Delivery Program: Manifolds

Standard hydraulic manifolds

Industrial hydraulic manifolds are used to interconnect various components within a hydraulic system. Standard hydraulic manifolds include a variety of proven manifold designs for a wide range of industrial hydraulic applications. Standard manifolds may improve the assembly and test time of your system, save cost, reduce leak points, and improve the serviceability and aesthetics of your system compared to alternate connection methods.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToManifolds

Features

- Size 6 (D03)
- Ductile iron pressure range to 5000 PSI
- Ductile iron manifolds blackened

Detailed information:

- RA09907

Technical Data

Model Code	ABM6PN-1X/02D2-01GM	ABM6PN-1X/04D2-01GM	CP6NN-XX/D-01
Number of stations	2	4	1
Description	Automotive bar manifold with bottom ported P & T		Cover Plate
Circuit	Parallel circuit, normal flow		Parallel Circuit, all ports blocked
Size	Size 6 (D03)		
Material	Ductile iron (65-45-12)		
Max. pressure (psi)	5000		
Ports	BSPP		N/A
Details	Metric mounting taps		

See technical data sheet RA 09907 for detailed technical data.

GoTo Focused Delivery Program: Proportional Electronics

Analog amplifiers for proportional valves without electrical position feedback

VT-VSPA1-1-1X

The VT-VSPA proportional amplifier controls solenoid current to Rexroth proportional valves without LVDT position feedback. Single solenoid driver cards have additional features for more flexibility. The user may configure the analog input, extend ramp time, and change setup for pre-defined valve types.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToelectronics

Features

- Analog amplifiers in Eurocard format
- Voltage stabilization, partially with raised measuring zero point
- Command value inputs for voltage and current
- Internal command value adjustment by means of 4 trimming potentiometers, call-up via relays, with LED indicator lamp (on some versions)
- Ramp generator, ramp times adjustable
- Jump function for quickly passing through overlaps of directional valves
- Enable input (on some versions)

Detailed information:

- RE30111

Technical Data

Operating voltage	U	VDC	24
Command value, depending on type	U	V	0 to 10, ± 10
	I	mA	4 to 20; 0 to 20
Output amplifier	Current-regulated, clocked		
Type of connection	32-pin form D (VT-VSPA1-1)		
Card dimensions	mm (in.)	Eurocard 100 x 160 (3.93 x 6.29), DIN 41494	
Ambient temperature range	ϑ	$^{\circ}\text{C}$ ($^{\circ}\text{F}$)	0 to +50 [+70] (0 to +122 [158])

Type	Suitable for valve type
VT-VSPA1-1-1X	DBE(M), (Z)DBE, (Z)DRE10, 3DRE(M)

GoTo Focused Delivery Program: Proportional Electronics

Analog amplifiers for proportional valves without electrical position feedback

VT-VSPA1-2-1X

This amplifier is suitable for controlling DBET-6X pressure valves or use as a universal amplifier. It has differential inputs for both voltage and current signals along with command call-ups.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToelectronics

Features

- Differential input (0 to +10 V)
- Current input (4 to 20 mA)
- 4 command value call-ups (only in conjunction with option A4)
- Ramp generator with separately adjustable ramp time for “up/down”

Detailed information:

- RE30115

Technical Data

Operating voltage	U	VDC	24
Power consumption	P_S	VA	< 24 VA
Current consumption	I	V	< 2
Fuse	I_F	A	2 (medium time lag, replaceable)
Inputs:			
Analog			
Command values 1 to 4 (potentiometer inputs)	U_e	V	0 to +10, $R_e > 100 \text{ k}\Omega$
Differential output	U_e	V	0 to +10, $R_e > 50 \text{ k}\Omega$
Current input	I_e	mA	4 to 20, load $R_L = 100 \Omega$
Type of connection	48-pin form F		
Permissible temperature range	ϑ	°C (°F)	0 to +50 (0 to +122)

Type	Suitable for valve type
VT-VSPA1-2-1X	DBET-6X

Part Number	Description	Max. Quantity	Shipment (Business Days)

GoTo Focused Delivery Program: Proportional Electronics

Electrical proportional amplifier

VT 2000-5X/

The VT-2000 is a proportional amplifier suitable for controlling single solenoid proportional pressure control valves without electrical position feedback.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToelectronics

Features

- Differential input
- Additional command value input, 0 to +9 V
- Separately adjustable ramp generator for up and down ramps
- Card holder:
Model VT 3002-2X/32, see RE29928

Detailed information:

- RA29904

Technical Data

Operating voltage	VDC	24 + 40% – 5%
Inputs	U_i	V 0 to 9 (reference potential is M0)
	U_i	V 0 to +10; $R_i = 100\text{ k}\Omega$
Ramp time (adjustment range)	t	30 ms to approx. 1 s or 5 s (depending on setting of S1)
Outputs: Output stage – Solenoid current / resistance		800 mA + 10% – 5%; $R_{(20)} = 19.5\ \Omega$
Permissible operating temperature range	°C (°F)	0 to +50 (0 to +122)

Type	Suitable for valve types
VT 2000-5X	DBEP, DBE...-5X

Part Number	Description	Max. Quantity	Shipment (Business Days)
R900033828	VT 2000-5X/	5	10

GoTo Focused Delivery Program: Proportional Electronics

Plug-in proportional amplifier

VT-SSPA1-50

The plug-in amplifier is suitable for mounting onto a valve connection base according to EN 175301-803. By turning the plug insert and the electronics in the housing, the plug-in amplifier can be mounted on the solenoid in 90° increments. User can adjust ramp time, maximum current, and bias current.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToelectronics

Features

- Used for controlling solenoid operated pressure control and directional valves without closed-loop position control
- Differential input, optional current input
- Ramp generator, separate for up/down
- Zero potentiometer / biasing current
- Command value attenuator / maximum current
- Operating voltage 24 V

Detailed information:

- RE30116

Technical Data

Operating voltage 24 V	U_B	VDC	24
	$u(t)_{\max}$	V	35
	$u(t)_{\min}$	V	18
Current / power consumption	I	A	< 2.6
(depending on solenoid data)	$P_{\max}$	A	< 60
Recommended back-up fuse	I	A	3, 15; slow-blow
Maximum current (adjustment range)	$I_{\max}$	A	$I_g \dots 2.6$
Clock frequency at $I_{\max}$	f	Hz	305
Command value input (voltage)			
Proportional range	U	V	0...10
Switching range	U	V	12 ... U_B
Resistance	R	kΩ	20
Type of connection (M12 component connector)			Component connector, 4-pin, M12x1
Type		Suitable for valve type

Technical Data

Operating voltage	U	VDC	24
Command value, depending on type	U	V	0 to 10, ± 10
	I	mA	4 to 20; 0 to 20
Output amplifier	Current-regulated, clocked		
Type of connection	48-pin male connector form F (VT-VSPA2-1)		
Card dimensions	mm (in.)	Eurocard 100 x 160 (3.93 x 6.29), DIN 41494	
Ambient temperature range	ϑ	°C (°F)	0 to +50 [+70] (0 to +122 [158])

Type	Suitable for valve type
VT-VSPA2-1-2X	4WRA...2X; 4WRZ...7X

Part Number	Description	Max. Quantity	Shipment (Business Days)
R901002090	VT-VSPA2-1-2X/V0/T1	5	10
R901002095	VT-VSPA2-1-2X/V0/T5	5	10

1) "Shipment" defined as – not to exceed the time from receipt of order to Bosch Rexroth Hydraulics to shipment ex-factory (Bosch Rexroth plant location).

GoTo Focused Delivery Program: Proportional Electronics

Analog amplifier module

VT 11118-1X/

The VT 11118 is suitable for controlling direct operated directional valves (model 4WRA, component series 1X only), pilot operated proportional directional valves (model .WRZ, from component series 5X) and proportional pressure reducing valves (model 3DREP 6) without electrical position feedback.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToelectronics

Features

- Selection of the valve type by means of change-over switch at the front
- Differential input for command value voltage ± 10 V
- Enable inputs
- Adjustable ramp generator
- Two command value attenuators
- Two output stages with fixed-frequency clocking
- LEDs: “power” – internal supply voltage (green)
“H1” – enable 1 (yellow)
“H2” – enable 2 (yellow)

Detailed information:

- RE30218

Technical Data

Operating voltage	U_o	24 V DC +40% (–10%)
Inputs		
Command value (differential input)	U_{Soll}	0 to ± 10 V; $R_e > 50$ k Ω
Outputs		
Solenoid current/resistance		
for 4WRA 6 (component series 1X)	I_{max}	1.75 A; $R_{(20)} = 5.4$ Ω
for 4WRA 10 (component series 1X)	I_{max}	1.75 A; $R_{(20)} = 10$ Ω
for .WRZ (component series 5X & 6X) and 3DREP 6 (component series 1X)	I_{max}	1 A; $R_{(20)} = 19.5$ Ω
for .WRZ (component series 7X) and 3DREP 6 (component series 2X)	I_{max}	1.75 A; $R_{(20)} = 4.8$ Ω
Clock-pulse frequency of the output stage		
for 4WRA 6 (component series 1X), .WRZ (component series 5X to 7X), 3DREP 6 (component series 2X)	f	175 Hz ± 10 %
for 4WRA 10 (component series 1X) and 3DREP 6 (component series 1X)	f	100 Hz ± 10 %
Type of connection		12 screw terminals
Type of mounting		Top hat rail TH 35-7.5 to EN 60715
Dimensions (W x H x D)	mm (in.)	40 x 79 x 85.5 (1.6 x 3.1 x 3.4)

Type	Suitable for valve types
VT 11118	4WRZ....-7X, 3DREP....-2X

Part Number	Description	Max. Quantity	Shipment (Business Days)
R900211788	VT 11118-1X/	5	10

1) “Shipment” defined as – not to exceed the time from receipt of order to Bosch Rexroth Hydraulics to shipment ex-factory (Bosch Rexroth plant location).

GoTo Focused Delivery Program: Proportional Electronics

External control electronics for the SYDFE1 control of A10VSO axial piston pumps, analog amplifier, configurable VT 5041-3X/

VT5041-3X analog amplifiers are designed as plug-in cards in Euro-format. They are external control electronics for the SYDFE1 control of A10VSO axial piston pumps analog amplifier.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToelectronics

Features

- Differential amplifier input
- Controller for valve spool position
- Minimum generator for pressure and swivel angle controller
- Self-clocking output stage
- Pressure-related leakage compensation (can be switched off)
- Polarity reversal protection for power supply
- Switchable actual pressure value input (current, voltage, range)

Detailed information:

- RE30242

Technical Data

Operating voltage	U_O	VDC	24 + 40% – 10%
Power consumption	P_S	VA	35
Current consumption	I	A	0.6 ($I_{max} = 1.25$ A)
Type of connection	32-pin male connector, DIN 41612, form D		
Card dimensions	Euro-card 100 x 160 mm, DIN 41494		
Permissible operating temperature range		°C (°F)	0 to +50 (0 to +122)
Storage temperature range		°C (°F)	–20 to +70 (–4 to +158)

Type	Suitable for pump types
VT-5041-3X/1-0	SYDFE1 control of A10VSO
VT-5041-3X/3-0	SYDFE1 control of A10VSO with power limitation

Part Number	Description	Max. Quantity	Shipment (Business Days)
R901236404	VT 5041-3X/1-0	5	10
R901196678	VT 5041-3X/3-0	5	10

GoTo Focused Delivery Program: Proportional Electronics

Analog amplifiers for proportional valves with electrical position feedback

VT-VRPA1-1...

The VT-VRPA1-100 proportional amplifier controls the DBETR proportional relief valves with position feedback. The VT-VRPA1-151 proportional amplifier controls 2FRE10 and 2FRE16 proportional flow control valves. The user may configure the analog input and extend ramp times.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToelectronics

Features

- Analog amplifiers in Eurocard format
- Voltage stabilization, partially with raised measuring zero point
- Differential input – 0–10 V/0–20 mA/4–20 mA
- Ramp generator that can be switched off
- Oscillator/demodulator for electrical position feedback
- PID-controller for controlling the control spool position
- Cable break detection with LED indicator lamp for position transducer; in the event of a cable break, the output amplifier is de-energized
- Enable input

Detailed information:

- RE30118

Technical Data

Operating voltage	U	VDC	24
Comm. value signal	U	V	0 to 6(9); 0 to 10; , ± 10
	I	mA	0 to 20; 4 to 20
Output amplifier			Current regulated, clocked
Oscillator frequency	f	kHz	approx. 2.5
Type of connection			32-pin form D
Card dimensions (W x L x H)		mm (in.)	Eurocard 100 x 160 (3.93 x 6.29), DIN 41494
Ambient temperature range	ϑ	°C (°F)	0 to +50 (0 to +122)

Type	Suitable for valve type
VT-VRPA1-100	DBETR
VT-VRPA1-151	2FRE10, 2FRE16

Part Number	Description	Max. Quantity	Shipment (Business Days)
R901057060	VT-VRPA1-151-1X/V0/0	5	10

GoTo Focused Delivery Program: Proportional Electronics

Electric amplifier

VT-VRPA1-5...-1X/V0

The VT-VRPA1-5...-1X/V0 is an amplifier for proportional pressure, proportional flow control, and high-response valves.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToelectronics

Features

- Analog amplifiers in Eurocard format for installation in 19" rack
- Output stage with closed-loop control
- Closed-loop position control with PID action
- Rapid energizing and de-energizing for fast response times
- Material description values for valve type:
 - PV = Pressure valve
 - QV = Throttle/Flow control valve
 - [] = Pressure relief valve

Detailed information:

- RE30052

Technical Data

Operating voltage	VDC	24
Plug connector		Connector DIN 41612 – F32
Valve solenoid max.	A/VA	2.7/25 & 3.7/50
Input signal	V	0 to ± 10
Card dimensions (W x L x H)	mm (in.)	Eurocard 100 x 160 x ~35 (3.93 x 6.29 x ~1.38)
Ambient temperature range	°C (°F)	0 to +70 (0 to +158)

Type	Suitable for valve type
VT-VRPA1-5...-1X/V0	DBETFX, DREB, DBETBX, 3FREZ, 4WRP

Part Number	Description	Max. Quantity	Shipment (Business Days)
0811405095	VT-VRPA 1-527-10/V0	5	10
0811405097	VT-VRPA 1-537-10/V0/PV	5	10

GoTo Focused Delivery Program: Proportional Electronics

Electric amplifier

VT-VRPA1-527-2XV0/2/2V

Electric amplifier VT-VRPA1-527-2X/V0/2/2V is used for controlling direct operated proportional throttle valves with electrical feedback, for block installation. This analog amplifier is in European format for installation in 19" racks.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToelectronics

Features

- Controlled output stage
- Enabling input
- Outputs protected against short-circuits
- Adjustment possible – zero point via trimming potentiometer
- Cable break detection for actual value cable
- Position control with PID behavior

Detailed information:

- RE30055

Technical Data

Operating voltage	VDC	24
Plug connector		Connector DIN 41612 – F32
Valve solenoid max	A/VA	2.7/25

GoTo Focused Delivery Program: Proportional Electronics

Electrical proportional amplifier

VT-VRPA1-5...RTS-2STV

The VT-VRPA1-5...RTS-2STV is suitable for controlling servo solenoid pilot operated two-stage valves. It has options for valve zero and gain. The ramps can be controlled by external voltage signals.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToelectronics

Features

- Analog amplifiers in Eurocard format for installation in 19" rack
- Output stage with closed-loop control
- Closed-loop position control with PID action
- Ramp functions:
 - External voltage-controlled ramp adjustment via differential inputs.
 - Ramp function can be deactivated

Detailed information:

- RE30044

Technical Data

Operating voltage	VDC	24
Plug connector		DIN 41612 – F32
Valve solenoid max.	A/VA	2.7/40 (Size 6)

GoTo Focused Delivery Program: Proportional Electronics

Electric amplifier for proportional cartridge throttle valves

VT-VRPA1-5...RTS-2/2V

The VT-VRPA1-5...RTS-2/2V controls throttle cartridge valves FESX with ramps.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToelectronics

Features

- Analog amplifier in Europe card format for installation in 19 rack
- Closed-loop controlled output stage
- Outputs short-circuit-proof
- Open-circuit detection for feedback signal cable
- Closed-loop position control with PID action
- Ramp function:
 - External voltage-controlled ramp adjustment via differential inputs
 - Ramp function can be shut down

Detailed information:

- RE30053

Technical Data

Card dimensions (W x L x H)	mm (in.)	100 x 160 x ~35 (3.93 x 6.29 x ~1.38) Eurocard format with front panel (7 modular spacing)
Plug connector		DIN 41612 – F32
Ambient temperature range	°C (°F)	0 to +70 (0 to +158)
Power supply (U_B at $z_2 - b_2$)		Nominal 24 VDC; Battery voltage 21...40 V, rectified AC voltage $U_{eff} = 21...28$ V (single-phase, full-wave rectification)
Maximum valve solenoid	A/VA	2.7/40
Current rating	A	1.5
Power consumption (typical)	W	37

GoTo Focused Delivery Program: Proportional Electronics

Analog amplifier card for 4/3 proportional directional valves of type 4WRE

VT-VRPA2-.../T1

The VT-VRPA2-1 controls direct operated proportional directional valves, type 4WRE6 series 2X. The VT-VRPA2-2 controls direct operated proportional directional valves, type 4WRE10 series 2X.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToelectronics

Features

- Designed as printed circuit board in Euro-format 100 x 160 mm and suitable for installation in a rack
- Command value inputs:
 - Differential input ± 10 V
 - Four callable command value inputs ± 10 V
 - Current input 4 to 20 mA
- Inversion of the internal command value signal via 24V input or by means of jumpers
- Selection of ramp time through quadrant recognition (24V input) or ramp time call-ups (24V inputs) (option T5)

Detailed information:

- RE30119

Technical Data

Operating voltage	VDC	24 + 40% – 20%
Power consumption	P_S	< 24 VA
Current consumption	I	< 2 A
Type of connection		48-pin male connector, DIN 41612, form F
Card dimensions (W x L x H)	mm (in.)	Eurocard 100 x 160 (3.93 x 6.29), DIN 41494

GoTo Focused Delivery Program: Proportional Electronics

Electrical amplifier for displacement control with proportional pumps

VT 5035-1X/

VT 5035 amplifiers are used for adjusting the flow of variable displacement pumps of types A4VSO and A4VSG with EO control (see RE92050, RE92076 and RE92100).

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToelectronics

Features

- Differential input
- Enable input with LED indicator lamp
- “Ready for operation” signalled by LED
- Ramp generator
- Four command values that can be adjusted by means of a potentiometer; call-up is signalled by LEDs
- Controller for swivel angle
- Two clocked current output stages
- Oscillator and demodulator for inductive position measurement with cable break detection
- Reverse polarity protection for power supply

Detailed information:

- RE29955

Technical Data

Operating voltage	U_O	VDC	24 + 40% – 5%
Power consumption	P_S	VA	< 50
Current consumption	I	A	< 2
Oscillator frequency	f	kHz	2.5 ± 10 %

Analog amplifiers for high-response valves VT-VRRA

The amplifier VT-VRRA1 controls standard servo solenoid valves with DC-LVDT feedback for direct operated 4WRPH...L-2X and 2-stage 4WRL...-3X. These are basic amplifiers. Since these components are normally used in closed loop applications, other features like ramp, time, and spool compenstion (jump) are not needed.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToelectronics

Features

- Analog amplifiers in Eurocard format
- Controlled output stage
- Enable input
- Short-circuit-proof outputs
- Adjustment options: Valve zero point
- Cable break detection for actual value cable
- Closed-loop position control with PID characteristics

Detailed information:

- RE30041

p/Q amplifier

VT-VARAP1

The p/Q amplifier is comprised of a base card with front panel containing the valve amplifier for 4WRPH6 with closed loop pressure controller. When used with the appropriate servo solenoid valves and pressure sensors, this unit can be employed for controlling flow and pressure in a closed-loop control circuit. The input parameters are the setpoints for pressure p and flow Q .

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToelectronics

Features

- Suitable for actuating directly operated and pilot operated servo solenoid valves
- Analog amplifiers in Eurocard format for installation in 19" rack
- Output stage with closed-loop control
- Rapid energizing and de-energizing for fast response times
- Enabling input
- Short-circuit-proof outputs
- External control shutoff
- Open-circuit detectin for feedback signal cable and pressure sensor
- Suitable for pressure sensors (1...6 V, 0...10 V, 4...20 mA)
- Closed-loop position control with PID action

Detailed information:

- RE30058

Technical Data

P.C.B. format (W x L x H)	mm (in.)	100 x 160 x ~35 (3.93 x 6.29 x ~1.38) Europe format with front panel (7 modular spacings)

p/Q controller

VT-VACAP

The input parameters for the card comprise the setpoint value for valve position, the setpoint value for pressure, the actual (feedback) pressure and any control mode signals. The pressure sensors with voltage interface receive their voltage supply from the card (z6/z8). Cards are for the connection of pressure sensors with both voltage and current signals.

The setpoint value for pressure is selected via potentiometer. The potentiometers can be supplied from the card (z32/b12). Test connections in the front plate and on the card are available for monitoring and compensation tuning of the most important parameters.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToelectronics

Features

- Analog amplifiers in Europe card format for installation in 19 rack
- Suitable for servo solenoid valves with on-board electronics
- Closed-loop position control with PID action
- Short-circuit-proof outputs
- External deactivation for pressure controller
- Suitable for pressure sensors (1...6 V, 0...10 V, 4...20 mA)
- Supply for pressure sensors
- Detection of open circuit to pressure sensors
- For valves with on board electronics (OBE)

Digital closed-loop control electronics

VT-HACD-3

The VT-HACD-3-2X closed-loop control electronics is a module that is installed on a top hat rail. A microcontroller controls the entire process, makes adjustments, establishes links and realizes the closed control loops. Data for configuration, command values and parameters are stored in a FLASH in a non-volatile form.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToelectronics

Features

- Use as command value card for generating, linking and normalizing signals
- Use as controller card for closed loop control with PIDT1 controller and optional state feedback
- Alternating control possible (e.g. position control with superimposed pressure control)
- Configurable analog and discrete I/O
- Digital SSI or incremental position measuring system
- Possibility of sequence control through block call-ups with command values, ramp times and controller parameters
- PC software BODAC for configuration, parameterization and diagnostics
- Field bus systems: PROFIBUS DP or EtherNet IP

Detailed information:

- RE30543

Technical Data

Operating voltage	VDC	24
Command value signal	V	0 to 10; +/-10
	mA	0 to 20; 4 to 20
Output signal	V	0 to 10; +/-10
	mA	0 to 20; 4 to 20
Scanning time	m/sec	2
Serial interface		RS 232
Installation		DIN Rail mount
Dimensions	mm (in.)	120 x 55 x 118 (4.72 x 2.17 x 4.65) compact module
Ambient temperature range	°C (°F)	0 to +50 (0 to +122)

Part Number	Description	Max. Quantity	Shipment (Business Days)
R901239533	VT-HACD-3-2X/0-I-00/000	5	10
R901239535	VT-HACD-3-2X/E-I-00/000	5	10

1) "Shipment" defined as – not to exceed the time from receipt of order to Bosch Rexroth Hydraulics to shipment ex-factory (Bosch Rexroth plant location).

GoTo Focused Delivery Program: Proportional Electronics

Analog positioning modules VT-MACAS

Analog position controller type VT-MACAS supports simple position or velocity control loops for hydraulic motion systems, in combination with Bosch Rexroth servo cylinders and analog position measurement systems (potentiometers).

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToelectronics

Features

- DIN-rail mountable
- Open-circuit detection for feedback signal cable
- Short-circuit-proof interfaces
- Measurement taps on front panel
- Deadband compensation can be deactivated
- Position: PT1 control

Detailed information:

- RE30050

Technical Data

Operating voltage	U	VDC	24
Command value, depending on type	U	V	0 to 10; ± 10
	I	mA	4 to 20 (middle 12)
Compensation step			Can be switched off; effective in range of $\pm 4\%$
Type of connection			Connectors + terminals
Card dimensions		mm (in.)	86 x 110 x 95.5 (3.4 x 4.3 x 3.8)
Ambient temp. range		$^{\circ}\text{C}$ ($^{\circ}\text{F}$)	0 to +70 (32 to +158)

Analog command value modules

VT-SWMA-1

Analog command value module type VT-SWMA-1 is used for controlling the hydraulic functions of valves with integrated electronics.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToelectronics

Features

- Supports realizing simple hydraulic functions via digital controlling
- Adjustment elements:
 - 1 potentiometer for zero point adjustment (command value offset)
 - 1 potentiometer for command value attenuation (for differential input)
 - 4 potentiometers for command value preselection
 - 5 potentiometers for ramp time adjustment
- 4 call-up possibilities each for command value and ramp time

Detailed information:

- RE29902

Technical Data

Operating voltage	U_o	VDC	24
Inputs			
Command value (differential input)	U_i	V	± 10
Quadrant operation	U_{4-Q}	V	
Command value inversion	U_{inv}		8.5 to 35
Command value call-ups 1 to 4	U		
Adjustment ranges (potentiometer)			
Zero balancing ("Z")			$\pm 30\%$
Amplitude attenuator ("G")			0% to ca. 110%
Command values ("w1" to "w4")			0% to ca 110%
Ramp times ("11" to "15")			20 ms to 5 s
Outputs			
Control variable	U		± 0 to 10 V; ± 2 mA
Measuring socket for control variable "w"	U_w		± 0 to 10 V
Measuring socket for ramp time "t"	U_t		0.01 to +10 V
Type of connection			12 screw terminals
Dimensions	mm (in.)		40 x 79 x 85.5 (1.6 x 3.1 x 3.4)
Operating temperature range	$^{\circ}\text{C}$ ($^{\circ}\text{F}$)		0 to +50 (32 to 122)

Command value and ramp modules

VT-SWMA3-5

Command value and ramp module type VT-SWMA3-5 is used to control proportional valves with integrated electronics.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToelectronics

Features

- 4 internal command values
- Direction logic (+/-)
- Adjustable ramps
 - I for $+U_A$
 - II for $-U_A$
- Selector switch for $\Delta T_{\max}$
- Input for "Ramps OFF"

Detailed information:

- RE30288

Technical Data

Operating voltage	VDC	24
Signal input "UE" analog		Mode I or II: 0...+10 Mode I + II: 0...±10
Logic commands	V	24; loaded: 2...5 mA
Operating state (mode)	Unipolar	Mode I (cl. 4) for $U_A = +$ or Mode II (cl. 5) for $U_A = -$
	Bipolar	Mode I + II for $\pm U_E \rightarrow \pm U_A$
Zero point		Mode I or zero point $\rightarrow 0$ V Mode I + II zero point with +0.5 V or adjust -0.5 V U_E
Dimensions	mm (in.)	860 x 110 x 95.5 (33.9 x 4.3 x 3.8)
Ambient temperature range	°C (°F)	0 to +70 (32 to 158)

GoTo Focused Delivery Program: Proportional Electronics

Card holder

VT 3002

The VT-3002 card holder is available in either a 32-pin or 48-pin connection format (Form D or Form F). Individual screw terminals aid in robust field connections while the VT-3002 provides a stable platform to anchor field connections. Push buttons on each side permit releasing an amplifier board without incurring undue stress on an amplifier's faceplate.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToelectronics

Features

- Card holders allow the simple installation and wiring of individual electronic cards in Euro format, e.g. in switching cabinets
- Can be screwed on or snapped onto DIN rails
- Vertical mounting onto a DIN rail, possible with an additional adaptor (included within the scope of supply)
- Stable base
- Card locking and releasing by lever operation
- Connection via screw terminals

Detailed information:

- RE29928

Plug-in switching amplifier

VT-SSBA1

The VT-SSBA1 switching amplifier is directly mounted on the valve's K4 connector. It is supplied with 24 V direct voltage. As a fast switching amplifier, the VT-SSBA1 considerably reduces the switching time of standard directional valves in connection with 12 V solenoid coils. As a power reducer, the switching amplifier considerably reduces the holding current when using 24 V standard directional valves.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToelectronics

Features

- Control of hydraulic on/off valves with 12 V solenoids which are to be switched fast (fast switching amplifier)
- Energy saving due to power reduction when controlling hydraulic on/off valves with 24 V solenoids (power reducer)
- Suitable for controlling on/off valves of type WE6 and WE10 with 12 V or 24 V DC solenoids
- Potted-in cable with open end
- 3-conductor connection, power supply and release separated
- Short-circuit proof output
- Status display of the switching status by LED
- CE mark

Detailed information:

GoTo Focused Delivery Program: Proportional Electronics

3/3 proportional directional valves direct operated, with electrical position feedback as pilot valves for control systems SY(H)DFE VT-DFP

The VT-DFP-A-2X/G24K0/0/V is the pilot control valve for the SYDFE1 system. In conjunction with amplifier VT5041, it controls the swashplate angle of the pump in either closed loop pressure or flow control. This valve is to be considered a part and not a complete control.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToelectronics

Features

- Pilot valve for the pressure and flow control system SY(H)DFE
- Actuation by means of a proportional solenoid with electrical feedback
- Control electronics:
 - VT-DFP (for SY(H)DFE1) → external analog amplifier VT 5041-3X/

Detailed information:

- RE29016

Service case with test unit for servo & proportional valves with integral electronics (OBE)

VT-VETSY-1

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToelectronics

Features

- The service case comprises a test unit, power supply unit 24 V, connecting cables and adapter cables (see ordering code)
- The test unit can be used to control and carry out functional tests on servo and proportional valves with integral electronics and operating voltages of ± 15 V or +24 V
- Simplifies commissioning and troubleshooting in hydraulic systems with servo and proportional valves

Detailed information:

- RE29685

Technical Data

Service case			
Dimensions	(W x H x D)		450 x 100 x 350 mm (17.72 x 3.94 x 13.78 in.)
Weight	empty	kg (lb-ft)	2 (4.41)

Pressure transducer for hydraulic applications

HM20

The HM20 measures pressure and outputs voltage or current. It is suitable for closed loop (feedback) and most industrial applications.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToelectronics

Features

- Measuring pressures in hydraulic systems
- Conversion of the measured pressure into a standardized electric analog signal
- Sensor with thick-film measuring cell
- Components that are in contact with the media are of stainless steel
- Operational reliability due to high bursting pressure, reverse polarity, overvoltage and short-circuit protection
- Compact design
- Very good temperature behavior
- Accuracy class 0.5
- 4-pin M12 connector at the housing
- Hydraulic port G1/4A
- Protection class IP65/IP67
- UL approval; CE approval

Detailed information:

- RE30270
- RE30272

Technical Data

Operating voltage	U_S	16 to 36 VDC		
Residual ripple	U_{PP}	2.5 V (40 to 400 Hz)		
Current consumption	I_{max}	6 mA (with voltage output)		
Measurement range	$p_N - \text{bar (psi)}$	100 (1450)	250 (3600)	400 (5800)
Output signal and admissible load R_A	I_{Sig} U_{Sig}	4 to 20 mA, two-wire, $R_A = (U_S - 8.5 \text{ V}) / 0.02 \text{ A}$ with R_A in Ω and U_S in V 0.1 to 10 V, three-wire, $R_A > 20 \text{ k}\Omega$		
Accuracy		<0.5% Related to the complete measurement range, including non-linearity, hysteresis, zero point and end value deviation (corresponds to the measuring deviation according to IEC 61298-2)		
Temperature coefficient (TK) in the nominal temperature range for zero point and range		< 0.1% / 10 K		
Hysteresis		< 0.15%		
Non-repeatability		< 0.10%		
Setting time (10 to 90%)	t	< 1 ms		
Service life		40 million load cycles or 40000 h		
Shock resistance, mechanical		15 g according to IEC 60068-2-27		
Vibration resistance in case of resonance		10 g according to IEC 60068-2-6		
Electromagnetic compatibility (EMC)		DIN EN 61326-2-3

BODAS RC Controllers

The BODAS controllers RC are used for the programmable control of proportional solenoids and additional switching functions. They can therefore be used for both simple and complex open- or closed-loop controls, e.g. for hydrostatic travel drives, working hydraulics or transmission control in mobile working machines. BODAS controllers RC were specially developed for use in mobile working machines, and satisfy the relevant safety requirements with regard to ambient temperature, moisture, resistance to shock and vibration, as well as electromagnetic compatibility (EMC).

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToMobileelectronics

Features

- Component of BODAS system for mobile applications
- Robust design meeting specifications for mobile applications
- High electromagnetic compatibility (EMC)
- Inputs and outputs with fault detection
- Safety features such as redundant inputs and central safety cut-off for all outputs
- Pulse-width-modulated (PWM) solenoid currents for minimum hysteresis
- Closed-loop control of solenoid currents, i.e. not dependent on voltage and temperature
- Sturdy, sealed aluminum housing

BODAS Tools

The BODAS-service PC software tool provides a convenient and user-friendly method of executing service functions for BODAS controllers from Rexroth. Parameters can be displayed and edited, process variables displayed, and their values graphically plotted and recorded. In addition, error messages and configurable diagnostics are provided.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToMobileelectronics

Features

- User-friendly Windows user interface, freely configurable work flow and online help
- Simultaneous display of multiple parameters for modification settings
- Simultaneous display of multiple process variables in graphical or numeric form
- Printout of all settings and process variables for documentation purposes
- Clear and easy-to-understand display of error messages
- Easy-to-use data logger: Save measured values (process variables and parameters) to the hard disk
- Selectable and expandable program language
- Adjustable device language (relevant to controller data, up to 4 languages available)
- Diagnosis configurations for simplified troubleshooting

Detailed information:

- RE95086

Technical Data

- Operating System:
 - Windows Vista
 - Windows 7 (only for BODAS-service. Not available for FT2 and BO-DEM)
- One free serial or CAN interface (depending on selected communications interface)
- One free USB interface (for license key - USB dongle)
- Available hard disk capacity > 200 MB
- Java runtime environment (installation occurs automatically)

BODAS Sensors and Connectors

Rexroth BODAS sensors measure different variables such as temperature of fluids, circuit pressure, angle of rotation, and position which provide vital information to mobile hydraulic systems. As a component of the BODAS system, these elements are designed to withstand high ambient loads, external vibrations and impact, and harmful fluids that are encountered in mobile applications.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToMobileElectronics

Features

- Harmonized to BODAS controllers and hydraulic components
- High temperature range
- Resistant to shock and vibration
- High electromagnetic compatibility
- Robust casing with high IP degree of protection

Detailed information:

- RE95160 (PO1)
- RE95155 (PR3)
- RE95140 (WS1)
- RE95180 (TSF)

Technical Data

Type	Measures	Measurement range	Input current (max.)	Protection class (with mating plug)	Plug connection	Application (typical)
TSF	Temperature	-40 °C to 150 °C	5 mA	IP64A	Jet connector, 2-pin	Enables the measurement of pressurized fluid temperatures of coolants, hydraulic oil or motor oil in vehicles.
TSA	Air Temperature	-40 °C to 150 °C	5 mA	IP64	Jet connector, 2-pin	Temperature measurement of the ambient air and charge air in vehicles
PR3	Pressure	400–600 bar	5 mA	IP67 and IP69K	AMP Superseal, 3-pin	For the measurement of pressure within hydraulic circuits, ideally suited for mobile applications.
WS1	Angle	-45°...+45°	11 mA	IP69K	AMP MQS, 6-pin	For the measurement of rotary move-ments of an adjusting shaft or angle of levers to determine the setting of diesel injection pump levers.
PO1	Position	0 to 10 mm	20 mA	IP69K	AMP Superseal, 3-pin	Intended for position measure-ment up to 10 mm. Typically for use as part of an electro-hydraulic hitch control.

BODAS Display

Display DI4

The BODAS DI4 display series is a robust and high-resolution color display for use in mobile working machines. The display has a 7-inch screen (800 x 480 pixels) and enables direct connection to two video cameras, e.g. working space and rear view cameras. In addition to two CAN bus interfaces, the DI4 has various analog inputs and outputs, as well as an USB interface for fast data exchange. In conjunction with the integrated BODAS-service communication interface, the DI4 serves as a central access point to the CAN bus network of the machine and allows full diagnostic and flash updates for connected BODAS RC controllers.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToMobileelectronics

Features

- iMX6 Solo processor, 800 MHz
- 2 GB flash memory and 256 MB RAM
- Large number of integrated interfaces as well as inputs and outputs: 2× CAN 2.0B, 1× USB 2.0, 3× digital/analog inputs, 2× digital outputs, 2× analog video inputs (PAL, NTSC)
- Integrated ambient light sensor
- Free programming as well as individual visualization and allocation of functions through CODESYS development environment
- Improved ease of use by ergonomic design
- Flexible application and integration options
- Diagnosis, parameterization and flashing of BODAS controllers without additional service tools

Detailed information:

- RE95272

BODAS Display

Color Video Camera

The BODAS color video camera, in combination with the BODAS DI3 display, facilitate the display of images from the work area or rearward area of a machine. Thanks to the high-quality optics and the CMOS image sensors, the BODAS cameras supply a high-quality and distortion-free image, even in the event of direct sunlight, and can be rendered reflected if necessary.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToMobileElectronics

Features

- Robust design for use in mobile equipment (IP69k)
- Flexible clamp for universal mounting
- Opening angle of 100° or 120°, horizontal
- High light sensitivity for use even at twilight
- Distortion-free picture display
- Integrated, self-activating heater

Technical Data

CAM-PRO/10	
Image sensor	1/4" CMOS
Signal format	NTSC
Image reproduction	525 lines, 60 images/sec
Illumination (min.)	0.5 Lux
Resolution	> 300 lines
Lens	Standard optics w/ image correction
Horizontal opening angle	100°
Vertical opening angle	85°
Nominal voltage	12 V and 24 V
Supply voltage	9...36 V
Power input	
Heating off	Approx. 1 W
Heating on	Approx. 4 W
Operating temperature	-40 °C...+85 °C

Part Number	Description	Max. Quantity	Shipment (Business Days)
R902603837	CAM-PRO/10 Camera	2	10
R902603838	CAM-XXX/10 Mating Cable	2	10

1) "Shipment" defined as – not to exceed the time from receipt of order to Bosch Rexroth Hydraulics to shipment ex-factory (Bosch Rexroth plant location).

GoTo Focused Delivery Program: Mobile Electronics

Analog Amplifier RA

The analog amplifier activates up to two proportional solenoids. The specified control voltage is processed in the amplifier as an input command signal. The analog amplifier provides a regulated electric current as an output signal for actuation of proportional solenoids.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToMobileelectronics

Features

- The electronic analog amplifier operates up to two proportional solenoids and a switching function:
- Optional interlock of actuation for proportional solenoids
- Supply voltage for external setpoint potentiometer
- Monitoring of setpoint potentiometer for cable breakage and short circuit
- Externally actuated switching output
- Error output
- Separately adjustable ramp times
- Overload protection, overvoltage protection, conditional short-circuit protection
- Separately adjustable I_{min} and I_{max} for every solenoid
- Externally adjustable PWM frequency

Detailed information:

- RE95230

Technical Data

		RA2-1
Nominal Voltage	12 and 24 V	
Residual ripple (DIN 40839, Section 1)	max. ± 2 V	X
Supply voltage, perm, range	10 ... 32 V	
Current Consumption		
without load	mA	150
with load, max.	A	6
Fuse		
external: for switching and proportional solenoid outputs and for electronics	A T	7.5
Potentiometer Supply Voltage	0 V, 4.0 V	X
(for setpoint potentiometer 2 ... 5 k Ω)	7.2 V ... 8.4 V (depending on load)

GoTo Focused Delivery Program: Mobile Controls

Stackable single axis hydraulic pilot controllers

2TH6

Hydraulic pilot control units of the type 2TH6 operate on the basis of direct operated pressure reducing valves. Pressure in the relevant control port is proportional to the stroke of the control lever. This pressure control as a function of the control lever position and the characteristics of the control spring enables the proportional hydraulic control of directional valves and high response control valves for hydraulic pumps and motors.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTomacontrols

Features

- Precise and play-free control characteristics
- Low actuation force at the lever
- Rust-free plunger
- Stackable single axis controllers, up to 6 controllers in one assembly
- Lever operator available “L” spring center, “P” friction detent, or “M” 3-position detent available
- Standard die-cast aluminum base or cast iron base for marine or underground applications

Detailed information:

- RE64552

Hydraulic pilot control units for armrest installation

4TH6

Hydraulic 4 ported pilot controller with joystick actuation. Accurate and smooth actuator control provides linear output for optimum machine control. Robust ergonomic joystick handle featuring double and single contact thumb rocker switch and one single contact trigger rocker switch for control of electrical on/off auxiliary control devices.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTomacontrols

Features

- Progressive, sensitive operation
- Low actuation forces
- Several ergonomic grips with various E contacts
- All connections point downwards

GoTo Focused Delivery Program: Compact Hydraulics

Inlet plate – basic

TA-00

The inlet elements TA-00-__ are employed to connect the external P, T lines to the P, T channels inside the ED elements of the Directional Valve Assembly and to connect to the LS ports of the elements equipped with LS channels.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTocompact

Features

- Port sizes: P and T – SAE 8; LS and G – SAE 4
- Includes a test point port “G” for pressure gauge connection
- Special plating and coating available, C.F.

Detailed information:

- RA18300-01

Technical Data

Maximum pressure	bar (psi)	210 (3000)*
Maximum inlet flow	l/min (GPM)	60 (15)
Material		Aluminum
Seals		NBR
Fluid temperature	°C (°F)	–20 to +80 (–4 to +176)

*For higher pressure, C.F.

GoTo Focused Delivery Program: Compact Hydraulics

Inlet plate – relief

TA-04

The inlet elements TA-04-__ are employed to connect the external P, T lines to the P, T channels inside the ED elements of the Directional Valve Assembly and to connect to the LS ports of the elements equipped with LS channels. They incorporate a pressure relief cartridge which limits the maximum primary pressure in the P line and unloads any excess flow to the tank.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTocompact

Features

- Port sizes: P and T – SAE 8; LS and G – SAE 4
- Special plating and coating available, C.F.

Detailed information:

- RE18300-02

GoTo Focused Delivery Program: Compact Hydraulics

Inlet plate – relief and dump

TA-05

The inlet elements TA-05-__ are employed to connect the external P and T lines to the P and T channels inside the ED elements of the Directional Valve Assembly. They incorporate a pressure relief cartridge which limits the primary pressure in the P line. The relief setting can be checked through the Test Point port G.

When fitted, the Normally Open Solenoid Unloading VEI Cartridge unloads to Tank all the P line flow; unloading stops when the cartridge coil is energized.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTocompact

Features

- Port sizes: P and T – SAE 8; LS and G – SAE 4
- Ports LS and G are provided with plugs
- Special plating and coating available, C.F.

GoTo Focused Delivery Program: Compact Hydraulics

Inlet plate – compensator

TA-06

The inlet elements TA-06-__ are employed to connect the external P, T lines to the P, T channels inside the ED elements of the Directional Valve Assembly and to connect to the LS ports of the elements equipped with LS channels. An LS controlled 3-way compensator provides pressure compensated flow to the ED elements of the Directional Valve Assembly. The same 3-way compensator is also controlled by a pilot relief cartridge and unloads to tank any excess flow in order to limit the primary pressure in the system.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToCompact

Features

- Port sizes: P and T – SAE 8; LS and G – SAE 4
- Ports LS and G are provided with plugs
- Special plating and coating available, C.F.

4/3 Directional valve elements

B8_05... (EDBY)

Directional valve elements B8_05... are compact direct-operated solenoid valves that control the start, stop and direction of oil flow. These elements consist of a stackable housing with a control spool, one or two solenoids, and one or two return springs.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTocompact

Features

- Valve elements with 4 ways and 3, or 2, positions
- Control spools directly operated by screwed-in solenoids with extractable coils
- In the de-energized condition, the control spool is held in the central position by return springs
- Wet pin tubes for DC coils, with push rod for mechanical override; burnish surface treatment

Detailed information:

- RA18300-50

Technical Data

General		
Weight (valve element with 2 solenoids)	kg (lbs)	1.2 (2.65)
Weight (valve element with 1 solenoid)	kg (lbs)	1.0 (2.20)

GoTo Focused Delivery Program: Compact Hydraulics

4/3 Directional valve elements, with PO check valves B8_45... (EDBY-VR)

Directional valve elements B8_48... are very compact direct operated solenoid valves which control the start, stop and direction of the oil flow. They consist of a stackable housing with a control spool, two solenoids and two return springs. The PO check valves consist of two calibrated balls with return springs which allow upstream flow, but lock on the respective seats and prevent the return flow. The return flow is possible when they are opened by the pilot piston, if enough pilot pressure is present in the opposite line.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTocompact

Features

- Valve elements with 4 ways and 3 positions
- Control spools directly operated by screwed-in solenoids with extractable coils
- In the de-energized condition, the control spool is held in the central position by return springs
- Wet pin tubes for DC coils, with push rod for mechanical override; burnish surface treatment

Detailed information:

- RA18300-51

4/3 Proportional valve elements

B8_80 (EDB-P)

Valve elements B8080... are compact direct operated proportional solenoid valves which control the start, stop, direction and the quantity of the oil flow. They consist of a stackable housing with a control spool, one or two solenoids, and one or two return springs. Energized by an electronic feed regulator, each solenoid displaces the control spool from its neutral-central position "0" proportionally to the current received. In open loop mode, a regulated oil flow P to A, or P to B, is achieved.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTocompact

Features

- Control spools directly operated by screwed-in solenoids with extractable coils
- In the de-energized condition, the control spool is held in the central position by return springs

Detailed information:

- RA18300-55

Spool variants:

B2: 4/3 operated both sides a and b; P -- T closed in neutral

E2: 4/3 operated both sides a and b; A and B to T in neutral

4/3 – 4/2 Directional valve elements

L8_10... (ED1-Z) & L8_11... (ED2-DZ)

The sandwich plate design directional valve elements L8_10... and L8_11... are compact direct operated solenoid valves which control the start, stop, and the direction of the oil flow.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTocompact

Features

- Valve elements with solenoid operated directional spool
- Control spools operated by screwed-in solenoids with extractable coils
- In the de-energized condition, the control spool is held in the central position by return springs
- Wet pin tubes for DC coils, with push rod for mechanical override; nickel plated surface
- Coils can be rotated 360° around the tube; they can be energized by AC current through special connectors with rectifier (RAC)
- Manual override (push-button or screw type) available upon request
- Plug-in connectors available; EN 175301-803 (was DIN 43650); AMP Junior; DT04-2P (Deutsch), free leads

4/3 Lever-operated directional valve elements

L8_L1... (ED-LV)

Directional valve elements L8_1... are compact manual operated valves which control the start, the stop and the direction of the oil flow. The hand operated lever moves the control spool from its neutral-central position "0" to the required position "a" or "b", and the required flow from P to A (with B to T), or P to B (with A to T) is achieved.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTocompact

Features

- Valve elements with 4 ways and 3 positions
- Control spools manual operated by hand lever
- Control spool with return spring or mechanical detent for all three positions.

4/2, 4/3 LUDV flow sharing directional valve elements L8511... (EDC-DZ)

Directional valve elements L8511... are compact direct operated pressure compensated solenoid valves which operate with a flow sharing principle. They consist of a stackable housing with control spool, two solenoids, and two return springs. When energized, each solenoid displaces the control spool from its neutral-central position "0" and the metering notches are open; flow is delivered to the 3-way pressure compensator followed by a check valve for each port A and B. The compensator, balanced by the LS pressure at the opposite end, lifts up and unloads a pressure compensated flow which is sent to the A (or B) port through the relevant check valve; at the same time the opposite port allows oil return to tank.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTocompact

Features

- Valve element with direct on-off flow sharing control
- It can achieve multiple simultaneous maneuvers by distributing the available flow to each actuator selected by the operator, independently from the working pressure required
- All simultaneous movements go on at the same reduced speed in case of flow shortage
- Each energized actuator receives a pressure compensated flow

GoTo Focused Delivery Program: Compact Hydraulics

4/3 – 4/2 Proportional directional valve elements with flow sharing control (LUDV)

L8580... (EDC-P)

The sandwich plate design directional valve elements L8580... are compact direct operated pressure compensated proportional solenoid valves which control the start, the stop, the direction and the quantity of the oil flow, with a Flow Sharing principle.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToCompact

Features

- Valve element with direct proportional flow sharing control
- It can achieve simultaneous activation of different actuators by distributing the available flow proportionally to the speeds selected by the operator
- Optional hand lever for dual electric and manual operation
- Manual override (push-button, screw type or lever) available upon request

Detailed information:

- RA18301-09

Technical Data

General		
Weight (valve element with 2 solenoids)	kg (lbs)	3.95 (8.71)
Weight valve element with 1 solenoid	kg (lbs)	3.6 (7.91)
Ambient temperature	°C (°F)	–20....+50 (–4....+122)
Hydraulic		
Maximum pressure (P, A, and B ports)	bar (psi)	310 (4500)
Maximum pressure (T)	bar (psi)	210 (3045)
Maximum pressure with lever emergency (T)	bar (psi)	140 (2030)
Max regulated flow at 14 bar (203 psi)	°C (°F)	40, 50 (10.5, 13.2)
Max regulated flow at 18 bar (261 psi)	°C (°F)	46, 58 (12.1, 15.3)
Hydraulic fluid General properties: it must have physical lubricating and chemical properties suitable for use in hydraulic systems such as, for example:		Mineral oil based hydraulic fluids HL (DIN 51524 part 1). Mineral oil based hydraulic fluids HLP (DIN 51524 part 2). For use of environmentally acceptable fluids (vegetable or polyglycol base) please consult us.

4/3 – 4/2 Directional valve elements

D8_5... (EDD-XZ)

The sandwich plate design directional valve elements D8_5 are compact direct operated solenoid valves which control the start, the stop and the direction of the oil flow.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTocompact

Features

- Valve elements with solenoid operated directional spool
- Control spools directly operated by solenoids with removable coils
- In the de-energized condition, the control spool is held in the central position by return springs
- Manual override (push-button, screw type) available as option
- Optional anti-cavitation/relief function available

Detailed information:

4/3 Load sensing directional valve elements

B8_05... (EDBY-LS)

Directional valve elements B8_05... are compact direct-operated solenoid valves that control the start, stop and direction of oil flow. These elements consist of a stackable housing with a control spool, one or two solenoids, and one or two return springs. With the LS connection, pressure difference at the main spool, as well as the flow to the actuator, is maintained constant via the pressure compensator.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTocompact

Features

- Valve elements with 4 ways and 3, or 2, positions
- Control spools directly operated by screwed-in solenoids with extractable coils
- In the de-energized condition, the control spool is held in the central position by return springs
- Wet pin tubes for DC coils, with push rod for mechanical override; burnish surface treatment

Detailed information:

- RA18300-50

Technical Data

4/3 – 4/2 Load sensing directional valve elements

L8_10... (ED1-LS-Z) & L8_11... (ED2-LS-DZ)

L8_10 and L8_11 directional valve elements with load sensing connections provide load pressure-compensated flow control for the start, stop, and direction of oil flow.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTocompact

Features

- Valve elements with solenoid operated directional spool
- Control spools operated by screwed-in solenoids with extractable coils
- In the de-energized condition, the control spool is held in the central position by return springs
- Wet pin tubes for DC coils, with push rod for mechanical override; nickel plated surface
- Coils can be rotated 360° around the tube; they can be energized by AC current through special connectors with rectifier (RAC)
- Manual override (push-button or screw type) available upon request
- Plug-in connectors available; EN 175301-803 (was DIN 43650); AMP Junior; DT04-2P (Deutsch), free leads

4/3 – 4/2 Load sensing directional valve elements proportional controls L8_80... (ED4-P-LS)

Proportional directional valve elements L8_80 with load sensing connections provide load pressure-compensated flow control for the start, stop, direction, and volume of oil flow.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTocompact

Features

- Valve element with direct proportional control of spool
- Control spool operated by screwed-in solenoid with extractable coil
- In the de-energized condition, the control spool is held in the central position by return springs.
- Wet pin proportional tubes for DC coils, with push rod for mechanical override; nickel plated surface
- Manual override (push-button or screw type) available upon request
- Plug-in connectors available: EN 175301-803 (Was DIN 43650) and DT04-2P (Deutsch)

Detailed information:

- RA18301-06

Technical Data

General		
Weight (valve element with 2 solenoids)	kg (lbs)	2.20 (4.85)
Weight (valve element with 1 solenoid)	kg (lbs)	1.70 (3.75)
Ambient Temperature	°C (°F)	–20....+50 (–4....+122) [NBR seals]
Hydraulic		
Maximum pressure (P)	bar (psi)	310 (4500)
Maximum dynamic pressure (T)	bar (psi)	210 (3050)
Maximum static pressure (T)	bar (psi)	250 (3625)
Maximum inlet flow	l/min (GPM)	45 (11.9)
Nominal flow with $\Delta P = 10$ bar	l/min (GPM)	10, 20, 30 (2.64, 5.28, 7.9)
Hydraulic fluid General properties: it must have physical lubricating and chemical properties suitable for use in hydraulic systems such as, for example:		Mineral oil based hydraulic fluids HL (DIN 51524 part 1). Mineral oil based hydraulic fluids HLP (DIN 51524 part 2). For use of environmentally acceptable fluids (vegetable or polyglycol base) please consult us.
Fluid Temperature	°C (°F)	–20....+80 (–4....+176) [NBR seals]

GoTo Focused Delivery Program: Compact Hydraulics

4/3 Load sensing lever-operated directional valve elements L8_L1... (ED-LV-LS)

Directional valve elements L8_1... are compact manual operated valves which control the start, the stop and the direction of the oil flow. The hand operated lever moves the control spool from its neutral-central position "0" to the required position "a" or "b", and the required flow from P to A (with B to T), or P to B (with A to T) is achieved.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTocompact

Features

- Valve elements with 4 ways and 3 positions
- Control spools manual operated by hand lever
- Control spool with return spring or mechanical detent for all three positions.

Detailed information:

- RA18301-10

Technical Data

Intermediate elements for interfacing ED with M4-12

TI-M412-__-__

The adaptor elements TI-M412 -__ are employed to connect an ED directional valve assembly to a main control valve Rexroth M4-12.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTocompact

Features

These elements consist of body made of Yellow Zinc plated (Cr+3) steel which incorporates the following items:

- a check valve on the P -- P1 line
- a shuttle valve on the LS lines
- a relief valve on the LS line which control max pressure output
- a pressure compensated orifice which drains the LS pressure by unloading a small regulated flow to tank

Detailed information:

Secondary pressure and anti-cav relief for EDC

L8565... (EDCM/EDCMF-VM)

These modular secondary elements can be flange mounted on top of the EDC elements machined with the interfacing surface. They let through free flow to the A (or B) port until pressure increases and reaches the selected pressure setting; then they release flow into the tank channels.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTocompact

Features

- Body made from yellow zinc-plated cast iron
- Designed for quick response and stable pressure control
- Incorporate a reverse flow check for anti-cavitation.

Detailed information:

- RA18301-45

Technical Data

General		
Weight	kg (lbs)	0.6 (1.3)
Ambient Temperature	°C (°F)	–20....+50 (–4....+120) [NBR seals]
Hydraulic		
Maximum pressure	bar (PSI)	310 (4500)
Maximum flow	l/min (GPM)	30 (7.93)
Hydraulic fluid General properties: it must have physical lubricating and chemical properties suitable for use in hydraulic systems such as, for example:	Mineral oil based hydraulic fluids HL (DIN 51524 part 1). Mineral oil based hydraulic fluids HLP (DIN 51524 part 2). For use of environmentally acceptable fluids (vegetable or polyglycol base) please consult us.	
Fluid Temperature	°C (°F)	–20....+80 (–4....+176) [NBR seals]
Permissible degree of fluid contamination	ISO 4572: $\beta_{x \geq 75} X=12...15$ ISO 4406: classe 20/18/15 NAS 1638: classe 9	
Viscosity range	mm ² /s	5....420

1) "Shipment" defined as – not to exceed the time from receipt of order to Bosch Rexroth Hydraulics to shipment ex-factory (Bosch Rexroth plant location).

GoTo Focused Delivery Program: Compact Hydraulics

Secondary pressure relief for EDC, A- & B-sides

L8561... (EDCM-VM5)

These modular secondary elements can be flange mounted on top of the EDC elements machined with the interfacing surface. They let through free flow to the A (or B) port until pressure increases and reaches the pressure setting; then they release flow into the Tank channels (T). The maximum secondary pressure in line A, or B, can be adjusted through the adjuster screw.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTocompact

Features

- Body is made of Yellow Zinc Plated (Cr+3) Cast Iron (CI)
- Hydraulic Ports A2 and B2 are size G3/8 and G1/2
- The modular version (M) enables flanging with other types of EDCM-modular-elements

Detailed information:

- RA18301-47

Technical Data

Cross-piloted check valves for EDC

L8541... (EDCM/EDCMF-VR)

These secondary flangeable elements can be interfaced and bolted on top of the A and B ports of the ED elements of the directional valve assembly. They incorporate two cross piloted check valves which allow free flow toward the A and B outlet ports, and lock in a leak-free mode the flow returning from the actuator, until sufficient pilot pressure is built up in the opposite line and the check valve is opened.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTocompact

Features

- Body made from yellow zinc-plated cast iron
- Hydraulic Ports A2 and B2 are size G3/8 or G1/2 or 3/4-16 UNF 2-B (SAE8)

1) "Shipment" defined as – not to exceed the time from receipt of order to Bosch Rexroth Hydraulics to shipment ex-factory (Bosch Rexroth plant location).

GoTo Focused Delivery Program: Power Packs and Motor Pump Groups

Power packs, fixed displacement

PP

PP Standard Power Packs utilize external gear pumps with standard industrial keyed shaft. Motors can be run at 60Hz/1750RPM/208-230/460V or 50Hz/1425RPM/190-208/380-416V. Motors are NEMA frame with female shaft.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTopowerpacks

Features

- Powder coated steel reservoir
- System relief valve & Gauge
- One station D03 aluminum bar manifold
- PP5 = 10μ absolute. PP10, 20 = 16μ absolute – in-tank return filter/filler/breather
- Check valve in pressure line
- Spare in-tank return down-line

Detailed information:

- RA09788

* Based on 1750 RPM, and 100% volumetric efficiency; actual flow will be lower.

** All max pressures reflect an 85% overall efficiency (1.15 SF not included in calculation).

[†] Limited by maximum continuous pressure of pump.

GoTo Focused Delivery Program: Power Packs and Motor Pump Groups

Close-coupled motor pump groups, fixed displacement

MPGB-AZP

Close-Coupled Motor Pump Groups type MPGB-AZP come fully assembled from our factory. Pumps are external gear type, standard industrial keyed shaft. Motors are NEMA frame, female shaft, and can be run at 60 Hz/1750 RPM/208–230/460 V or 50 Hz/1425 RPM/190–208/380–416 V.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTopowerpacks

Features

- Eliminate the need for multiple vendors by giving you one source of supply
- Closed-coupled feature dramatically reduces the overall length of the motor pump group
- Motor pump groups can be mounted horizontally or vertically

Detailed information:

- RA12750

GoTo Focused Delivery Program: Power Packs and Motor Pump Groups

Pre-assembled filter/cooler module MFC3

The MFC3 is a compact off-line filtration/cooling package, which provides numerous mounting and configuration options. The design allows for multiple selections of AC motors, pumps, filter elements, and auxiliary components. The modular design concept permits field upgrades concerning oil flow, filtration, or configuration with minimal labor and cost.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTopowerpacks

Features

- Off line does not interrupt production
- Versatile / Simple Modular design concept
- Space saving vertical designs
- Durable common base construction
- Multiple mounting and configurations
- Multiple pump, and filter element selections
- Dual frequency motor windings standard
- Stainless Steel, plate style heat exchangers
- Single supply source
- Extensive international distribution and service

Detailed information:

GoTo Focused Delivery Program: Power Packs and Motor Pump Groups

GoPak™ Hydraulic Power Packs

Bosch Rexroth GoPak™ hydraulic power units (HPU) bridge the gap between standard market products and engineered-to-order power units for machine tool, plastics, automotive, material handling, presses, marine, and other hydraulic applications. Rexroth's GoDesigner™ smart configurator software tool expedites the selection of pumps, motors, valves and other peripherals so customers can get quotes in a day, with lead times as short as four to six weeks (three weeks when configured with designated Rexroth "GoTo" sub-component products).

For complete engineering and design information:
 USA & Mexico: www.boschrexroth-us.com/GoPak
 Canada: www.boschrexroth.ca/GoPak

Features

- Millions of variants possible (expansive feature options)
- High quality tank-top pump-motor group design
- Reservoir sizes from 5 US gallons to 200 US gallons (mineral oil fluid)
- Horsepower range from 1 to 75
- Pressure range from 200 to 4000 psi
- Pump displacement range from 4 to 140 cm³ per revolution (variable and fixed models)
- Durable and attractive powder coated finish
- Extensive and immediate document package on request - conditions apply (price and delivery, selection summary, terms and conditions, warranty, commissioning, bill of material, schematic, 2D dimensioned and ballooned drawing, interactive 3D model, highlighted sub-component data sheets)
- GoTo variants ship in 3 weeks
- Quotes provided via GoDesigner™ (advanced design configurator) in 1 business day or less
- GoDesigner™ tool provides know-as-you-go pricing, detailed engineering tools for sizing optimization, and on-the-fly detailed sub-component information
- Regional support across North America from our knowledgeable GoPak™ Champions (product, application, and design configurator expertise)

Technical Data

- Please navigate to www.boschrexroth-us.com/GoPak (USA & Mexico) or www.boschrexroth.ca/GoPak (Canada) for a complete listing of options, noting that exceptions apply; see below...
- For GoTo GoPak™ variants (3 week shipping lead-time, max quantity of 1 unit), the following features of the standard GoPak™ have been limited as noted:
 1. No combination starter with disconnect (Industrial Level). ALTERNATIVE – non-combination starter (Entry Level – no short circuit protection).
 2. No aluminum barstock manifolds. ALTERNATIVE – ductile iron barstock manifolds (Electroless Nickel surface treatment).
 3. No indirect immersion heater. ALTERNATIVE – direct immersion heaters.
 4. No custom coatings/colours. ALTERNATIVE – powder coated black.
 5. No forklift bracket. ALTERNATIVE – Use lifting strap or lugs.
 6. No drip tray.

GoTo Focused Delivery Program: Accumulators

Bladder-type accumulators

HAB-6X

The HAB design is a hydro-pneumatic type accumulator with compressed nitrogen separated from hydraulic fluid by means of an elastomeric bladder. The current generation of bladder accumulators from Bosch Rexroth carries the HAB-6X designations. The HAB product line is available in many different configurations needed to meet the stringent demands of today's market.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToaccumulators

Features

- Sizes 1L to 50L
- Hydraulic accumulator according to Pressure Equipment Directive 2014/68/EU
- CE stamp on all units 2.5L and larger
- NBR (buna) and ECO (Hydrin) bladder options
- Two piece gas valve design for improved serviceability

Use:

- Energy storage in systems with intermittent operation
- Energy reserve for emergencies
- Compensation for leakage losses
- Impact and vibration dampening
- Flow compensation based on pressure and temperature effects

Detailed information:

- RE50171

Bladder-type accumulators

HAB-7X

The HAB design is a hydro-pneumatic type accumulator with compressed nitrogen separated from hydraulic fluid by means of an elastomeric bladder. The current generation of bladder accumulators from Bosch Rexroth carries the HAB-6X and HAB-7X designations. The HAB product line is available in many different configurations needed to meet the stringent demands of today's market.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToaccumulators

Features

- Hydraulic accumulator according to ASME Section VIII pressure vessel code
- CRN certificate possible (not all sizes, consult factory)
- Bladder materials for different applications
- Two piece gas valve design on 2.5 gallon and larger units for improved serviceability

Use:

- Energy storage in systems with intermittent operation
- Energy reserve for emergencies
- Compensation for leakage losses
- Impact and vibration dampening
- Compensation of flow in the case of changes in pressure and temperature

Detailed information:

- RA50175

“-CRN”: Units have a Canadian Registration Number stamped into the shell indicating certification to Canadian pressure vessel regulations. The units also have the standard ASME certification & stamping.

Function & Performance Data

Bottom Repairable, 3K	Nominal volume (GAL)	1 QT	1 G	2.5 G	5 G	10 G	15 G
	Effective gas volume (L)	1.0	3.4	9.3	18.8	35.3	53.7
	Max operating pressure (psi)	3000	3000	3000	3000	3000	3000
Operating Temperature	Nitrile, Buna-n (NBR)	5 °F to 200 °F					
Flow Output (Standard SAE fluid port, max. flow rate dependant on fluid viscosity and accumulator orientation.)	Nominal volume (GAL)	1 QT	1 G	2.5 G	5 G	10 G	15 G
	Max flow rate (GPM)	79	119	238			
Pre-Charge Ratio Limitation	Maximum ratio of system pressure to pre-charge pressure, 4:1						
Installation Position	Recommended vertical with gas side up, other positions may reduce accumulator performance and bladder life						
Fluid	Mineral oils to DIN 51524, HFC to ISO 12922, other fluids compatible with bladder compounds listed.						
Gas	Nitrogen gas with typical purity 99.99%

GoTo Focused Delivery Program: Accumulators

Diaphragm-type accumulators

HAD

The HAD design is a hydro-pneumatic type accumulator that utilizes compressed nitrogen to supply fluid to the hydraulic system. The nitrogen and hydraulic fluid are separated by means of an elastomeric membrane. HAD units are the diaphragm welded non-repairable type that can be supplied in both non-rechargeable and chargeable versions.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToaccumulators

Features

- Hydraulic accumulator according to Pressure Equipment Directive 97/23/EC
- HAD sizes range from 0.075L to 3.5L
- HAD pressure rating 250 bar on most sizes, with special options available up to 350 bar.
- HAD units are economical solutions for pulsation dampening and energy storage applications where only a small volume of usable fluid is required.
- Very compact design allows for the use of the HAD product in the smallest of locations, industrial or mobile hydraulic in nature.
- Multiple elastomer options for many different fluid and temperature driven applications.
- Multiple fluid port options are available such as UNF, NPT, BSPP, and metric M threaded designs.
- Two gas valve options are available for pre-charging, the standard Schrader valve type common for the US market (7/8"-14UNF connection) and the European standard M28 threaded connection.

GoTo Focused Delivery Program: Accumulators

Accumulator safety blocks

ABZSS

Rexroth ABZSS safety blocks can be used in any system that incorporates a hydraulic accumulator. Safety blocks not only perform safety functions such as pressure relief, unloading and isolation, but also provide a mounting base for accumulator installation and a quick means to access system pressure readings.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToaccumulators

Features

- Sizes 08 to 30
- Safety block design per DIN 24552
- Pressure relief valves can be PED type approved (CE)
- NBR (buna) and FKM (viton) seal options
- Discharge valve can be either manually or electronically actuated
- Pressure relief valve for safety purposes
- Discharge valve can drain accumulator pressure for system shut down
- Ball valve can isolate accumulator pressure from circuit
- Optional lock-out version possible

Detailed information:

- RE50131

GoTo Focused Delivery Program: Filtration Systems

Flexi-bowl™ tank mounted return filter housings

10 TEN 0040 to 1000

The Flexi-bowl™ version of the tank mounted return line filters come without filter elements in order to give customer flexibility, reduced inventory and lead times.

Must be purchased separately: Replacement filter elements for Rexroth filters: Filter media for all applications made out of glass-fiber-paper, filter-paper, wire mesh, non-wovens, and metal fiber.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTofilters

Features

- Utilizes the customers choice of Rexroth filter elements
- Adsorption of very fine particles across a broad pressure differential range
- High dirt holding capacity thanks to large specific filter area
- Good chemical resistance of the filter elements
- High collapse resistance of the filter elements (e.g. in case of cold start)
- Filter ratings: 3...100 µm
- As standard, each filter is equipped with mechanical-optical maintenance indicator with memory function

1) "Shipment" defined as – not to exceed the time from receipt of order to Bosch Rexroth Hydraulics to shipment ex-factory (Bosch Rexroth plant location).

Tank mounted return line filters and replacement filter elements

10 TEN 0040 to 1000

The tank mounted return line filters are designed for installation on fluid tanks. They serve the separation of solid materials from the whole fluid flowing back to the tanks.

Replacement filter elements for Rexroth filters: Filter media for all applications made out of glassfiber-paper, filter-paper, wire mesh, non-wovens, and metal fiber.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTofilters

Features

- Special highly efficient filter media
- Adsorption of very fine particles across a broad pressure differential range
- High dirt holding capacity thanks to large specific filter area
- Good chemical resistance of the filter elements
- High collapse resistance of the filter elements (e.g. in case of cold start)
- Filter ratings: 3...100 µm
- As standard, each filter is equipped with mechanical-optical maintenance indicator with memory function

Detailed information:

- RE51424

GoTo Focused Delivery Program: Filtration Systems

Flexi-bowl™ line mounted filter housings

245 LE(N) 0040 to 400

The Flexi-bowl™ version of the inline filters come without filter elements in order to give customer flexibility, reduced inventory and lead times.

Must be purchased separately: Replacement filter elements for Rexroth filters: Filter media for all applications made out of glass-fiber-paper, filter-paper, wire mesh, non-wovens, and metalfiber.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTofilters

Features

- Utilizes the customers choice of Rexroth filter elements
- Adsorption of very fine particles across a broad pressure differential range
- High dirt holding capacity thanks to large specific filter area
- Good chemical resistance of the filter elements
- High collapse resistance of the filter elements (e.g. in case of cold start)
- Filter ratings of 3 µm to 100 µm
- As standard, each filter is equipped with mechanical-optical maintenance indicator with memory function
- Flow-optimized design due to 3D computer-supported design
- Features patented Cyclone head design which extends element life 7–10%

GoTo Focused Delivery Program: Filtration Systems

Line mounted filters and replacement filter elements

350 LE(N) 0040 to 1000

Line filters are used in hydraulic systems for separating solid materials from the hydraulic fluids and lubricating oils. They are intended for installation into pipelines.

The 350LE(N) line filters are suitable for direct installation into pressure lines. They are mostly installed upstream open-loop or closed-loop control units to be protected.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTofilters

Features

- Special highly efficient filter media
- Adsorption of very fine particles across a broad pressure differential range
- High dirt holding capacity thanks to large specific filter area
- Good chemical resistance of the filter elements
- High collapse resistance of the filter elements (e.g. in case of cold start)
- Filter ratings of 3 µm to 100 µm
- As standard, each filter is equipped with mechanical-optical maintenance indicator with memory function
- Flow-optimized version due to 3D computer-supported design
- Features patented Cyclone head design which extends element life 7–10%

GoTo Focused Delivery Program: Filtration Systems

Flexi-bowl™ block mounted sandwich filters

320 PZR 025 to 100

The Flexi-bowl™ version of the sandwich mount filters come without filter elements in order to give customers flexibility, reduced inventory and competitive lead times. Rexroth filter elements must be purchased separately. Standard filter media for sandwich filters is woven micro-fiberglass material.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTofilters

Features

- Filter for sandwich plate mounting with filter bowl left or right
- Port patterns to ISO 4401, NG6 and NG10
- Cyclone effect flow path increases dirt holding capacity
- Filter elements feature stainless steel support mesh for high durability
- Various optical and electrical clogging indicators are available
- Non-bypass design for high system protection

GoTo Focused Delivery Program: Filtration Systems

Desiccant air breathers

BFSK-2X

Highly efficient breather desiccant BFSK-2X filter provides true air filtration and dehumidification of incoming and outgoing air flow. The BFSK series filters capture very fine contaminant particles and provide high dirt holding capacity using a pleated, microglass element.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTofilters

Description

- Sizes 25, 40, 80, 125
- Micro-glass filter element (3 microns) material provides true depth filtration
- Check valve option to extend the life of the desiccant
- Sturdy construction uses metal center tubes
- Maintenance indicator option for improved monitoring
- Desiccant material is non-toxic and non-carcinogenic
- Desiccant pack is replaceable on sizes 40, 80, 125
- Air filter element can be replaced on all sizes

Detailed information:

- RE51456

Technical Data

Size		25	40	80	125
Maximum pressure differential	PSIG	14.5			
Air filter – microglass	microns	3.0			
Weight	lbs	0.9	3.3	6.4	9
Silica gel (desiccant)	cm ³	100	600	1000	2000
Water absorption	ml	28	172	288	576
Check valve cracking pressure	PSIG	0.15			
Ambient temperature range	°F	-40 to 185			
Operating temperature	°F	-18 to 185			
Installation position		Vertical

GoTo Focused Delivery Program: Filtration Systems

Breather filters:

BFS 7, BFS 20; BF 7 SL; FEF 0, FEF 1; TLF I, TLF III

	Filtration and dehumidification of the intake air of industrial systems. Avoidance of initial damage in pumps and bearings, and system components. For complete engineering and design information: GoTo www.boschrexroth-us.com/GoTofilters

Design

Model BF 7 SL

Breather filter with threaded filter cartridge and 10 micron pleated filter element.
Flange connection (BF 7 SL...).

Detailed information:

- RE51413
- RE51414
- RE51415

BFS 7, BFS 20

Compact design male thread breather with 10 micron pleated paper filter element.
Materials as per spare parts list.

Models FEF 0, FEF 1

Combination filler breather with mounting flange and filling filter (screen basket 500 µm) and removable cap with bayonet lock. The internal breather filter element is 40 µm. The filter element

is replaced by exchanging the whole metal cap. The breather cap is secured to the reservoir with a chain.

Materials as per spare parts list.

Models TLF I, TLF III

Removable filter breather housing with internal replaceable filter element. Filter element H10XL, H3XL up to a filtration rating of 10 µm and 3 µm with glass fiber material.

Materials as per spare parts list

Designs:

TLF I...: with female thread,

TLF III...: with male screw-in thread and filling filter (screen basket 130 µm).

GoTo Focused Delivery Program: Filtration Systems

GoTo Analysis Kit

GTAK

Fluid contamination is a major factor that can cause premature failures of hydraulic systems and components. An effective fluid analysis program can identify contamination and other problems not visible to the naked eye. Once high levels of contaminants are confirmed, corrective actions can be undertaken prior to the advent of costly catastrophic equipment failures. The GTAK fluid analysis kit can be used to obtain a complete and comprehensive laboratory analysis on a customer supplied fluid sample. The GTAK kits are supplied with pre-addressed labels for shipment to any one of multiple labs located throughout the United States. Results are quick and can be obtained via email or on the internet. Trend analysis is possible and easy to obtain for continuous monitoring of equipment.

For more information:
GoTo www.boschrexroth-us.com/fluidtest

Description

- 8 oz ISO CLEAN sample jar
- Sample submittal form
- Shipping container
- Prepaid laboratory analysis
- Quick results sent via E-mail
- On-line trend analysis via Horizon system

Technical Data

Laboratory analysis included with every kit

Elemental Metal Analysis (24) by ICP
Viscosity @ 40°C
Viscosity @ 100°C
Viscosity Index
Acid Number
Oxidation/Nitration by FTIR
ISO 4406 Particle Count
Karl Fischer Water %

Online particle monitor

OPM II

The OPM II is a visual particle monitor that measures the level of contamination and the purity trend of non-aggressive fluids based on the light-extinction principle. In operation, a laser radiates through the measuring cell, directed against a photo diode. As fluid particles pass through the laser beam, the reflected light is reduced and recorded accordingly. Due to the continuous purity monitoring, changes in a system are quickly identified and consequential damage can be avoided.

For more information:
GoTo www.boschrexroth-us.com/GoTofilters

Description

- Can be integrated into external systems, or operated independently
- Results can be transferred to a PC for better analysis
- Fluid cleanliness class is optionally displayed according to ISO 4406:99 or SAE AS4059E
- Temperature is measured via electronic circuit board
- Includes "operating hours" counter, that restarts counting at the last stored time before any interruption

Detailed information:

- RE51460

Technical Data

Operating conditions	– Admissible operating pressure	bar (psi)	Dynamic: 420 (6091) / Static: 600 (8702)

Popular cross-over filter elements

Rexroth cross-over filter elements are designed to replace your existing products, even those manufactured by other companies. Rexroth filter elements present the highest quality option for separation of solid materials from the whole fluid flowing back into the tanks. All cross-over elements listed in this section have a maximum order quantity of five and will ship in one day.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoTofilters

Description

- Designed for optimum flow characteristics to achieve reduced pressure drop
- Finest materials and manufacturing processes used yield highest available beta efficiencies
- Compatible with different oil types, including rapidly biodegradable hydraulic oils
- Element lifetime increased due to materials and design - get more from your investment

Hydro-electric pressure switch

HED 8

Hydro-electric pressure switches of model HED 8 are piston-type pressure switches used to monitor a pressure value in a circuit. As a pressure value is achieved (rising or falling), the HED micro-switch changes state, which can be used as an indicator for the next sequential operation or shutdown. The HED microswitch is not a current carrying device; it is an actuator/sensor.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToaccess

Features

- For subplate mounting
- For in-pipe installation
- As vertical stacking element, position of ports to DIN 24340 form A
- In horizontal stacking assemblies
- Five pressure stages, optional
- Adjustment option:
 - Rotary knob with scale
- Cable socket with circuitry (indicator lamp) – separate order

Detailed information:
• RE50061

Rotary angle sensor

VT-SWA-1

Features

- Suitable for use in SYDFEE and SYDFEC systems (systems with integrated electronics) for sensing the swivel angle of the A10V(S)O...DFE... pump and conversion of the measured value into an electrical signal
- Contact-free acquisition of a rotary angle using a Hall-effect sensor
- Consisting of magnet carrier and sensor with integral electronics in the housing

Detailed information:

Cable set

Z31

Cable Set Z31 for on-board electronic valves with 7-pin connectors. This flexible cable has a nominal 9 mm outside diameter and it includes an overall shielded. The polyurethane jacket resists oil, many chemicals, and considerable abrasion. The high quality 7-pin connector is over-molded to the cable, for worry-free connection to the OBE valve.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToaccess

Features

- Black polyurethane jacket
- Flexible conductors with overall shield
- Flame retardant
- Halogen-free
- RoHS compliant
- UL Recognized for North America
- 3, 5, 10 meter lengths

Detailed information:

- RE08006

GoTo Focused Delivery Program: Accessories

VT Patch Cord

Type VT Patch cords are used for connecting between a VT card faceplate test jack and an analog/digital meter for the purpose of measuring voltage of the amplifier card. They are supplied with a 2 mm (0.0787 in) diameter plug on one end and a 4 mm (0.157 in) diameter plug on the other. They are connected by a 100 cm (40 in) length of silicone insulated wire (0.55 sq. mm/20 AWG). Available in both red and black colors.

For complete engineering and design information:
GoTo www.boschrexroth-us.com/GoToaccess

Features

- For servicing or troubleshooting
- Measures voltage of amplifier card via VT card test jack
- Can be used with Rexroth test point and system cards
- Red or black color

Detailed information:

- RA29785
